Bachelor of Social Work in Social Work

Table 4. Applied, Admitted, and Newly Enrolled Students. The number of applicants, admissions, and students newly enrolled to the program in the fall semester of the academic year identified. The applied and admitted counts include only students who identified the program on their applications to the university. The enrolled category includes students who included the program on their application to the university. Additionally, the table include counts of students who indicated a different program on their application to the university and elected to enroll in the program upon admission. Counts include both students new to the program and students previously enrolled returning after a break in enrollment.

Table 5. Annual Unduplicated Headcount. Counts of unique students attending the program in a given year. Students who change major are counted in program last enrolled. Students enrolled in multiple semesters are counted once each year. The counts include self-reported gender and race/ethnicity. Counts include students identifying as Hispanic in the Hispanic ethnicity and not in their reported race categories. The other race category includes students who identified in races not presented in the table. The table includes the census date classification of students of the last semester attended in the academic year. Students who enroll in 12 undergraduate or 9 graduate hours in any semester during the year are categorized as full-time; otherwise they are categorized as part-time. Counts for race/ethnicity and age are masked for values fewer than five and denoted by period.

Table 6. Semester Credit Hours. Hours attended by students who declared the program as their major in the year indicated by level, gender, race and ethnicity, and student classification. Hours include all course enrollments by the students in the program including those taught outside the program's department and college (i.e., electives and courses required for minors).

Table 8. Semesters-to-Degree. The average number of semesters students attend classes at the university to complete the program. The average excludes the semesters attended to complete lower level work at community colleges or other universities. The averages include students completing a degree in the year indicated. The reported values exclude students persisting or no longer enrolled at the university. The averages excludes students completing a second degree at the same level.

Table 11. Employed in Texas. The Texas Exit Cohort Report published each year by the Texas Higher Education Coordinating Board (THECB) provides the percentage of graduates employed in Texas one year after graduation. The report matches graduates to state employment records one year after graduation. The report does not include students who are self-employed or working outside of Texas. Values are suppressed for metrics with five or fewer graduates.

Table 13. Student Success Rates. Fall-to-fall success rates include the count of students newly enrolling each fall semester and the percentage of those students who enrolled the following fall semesters or graduated from the program. Students who changed majors during their academic careers are excluded from both the numerators and denominators. The student counts includes newly enrolled students for the fall of the indicated academic year where the students do not persist at the university in a different major. Persistence rates lag a year and missing values are shown for the later years due to pending data. Instances where students do not persist at the university in a different major and are not enrolled or graduated are presented as zero.

Ideally, reviewers would prefer to see counts of faculty teaching students in a given program. However, many faculty teach students in a variety of programs at the university. To provide reviewers a helpful view of the faculty available to programs, the tables include counts of faculty teaching subjects managed by the same department and at the same level as the program being evaluated. Full-time teaching faculty will have taught 4 undergraduate or 3 graduate courses during one or more semesters in the academic year. Some full-time faculty perform duties prohibiting them from teaching a full-time course load. Those faculty, while full-time are counted as part-time teaching faculty. The tables include counts by rank, race/ethnicity, gender, and age.
