THE SKILLS YOU NEED FOR THE CAREER YOU WANT

Be the expert in the room. The marketable skills and experience you gain as a part of the BBA CIS program will make you a valuable member of any organization.

- **Soft Skills** – Gain essential workplace expertise such as cross functional collaboration, goal-oriented project management, strong decision making, critical thinking and effective communication.

- **Programming** - Gain expertise in programing languages such as Java, C++, C#, Visual Basic, HTML, CSS and Java Script to create software applications and design websites for businesses. Similarly, become an expert in software development technologies such as Visual Studio and Visio

- **Database Design and Development** - Design and develop database applications using SQL and PL/SQL to create and manage databases.

- **Quantitative Communication and Processing** - Inspect, clean and mode data to create useful information and provide expert solutions.

- **Cybersecurity and Risk Management** - Apply security techniques to protect the organizational information assets including business continuity and disaster recovery planning.

- **IT Project Management and Infrastructure** - Plan, schedule and manage information technology resources using Microsoft Project. Also, learn to install, configure and maintain Windows and Linux-based systems including enterprise systems and virtual systems. Design and set up corporate networks using tools such as Wireshark and Packet Tracer.

PICK YOUR CONCENTRATION

Depending on your career preference, you can choose from four areas of specialization. All BBA CIS concentrations provide you with the business acumen and technical knowledge you need to be an integral part of any organization.

- **Business Analytics**
- **Cybersecurity**
- **Management and Networking**
- **Software Engineering and Database Design**
- **Micro-credential options available. Speak to an advisor for more details.**

TECHNOLOGY-DRIVEN, BUSINESS-FOCUSED

Companies of all sizes rely heavily on the skills and knowledge of technology professionals to keep business moving.

Our BBA program in Computer Information Systems combines current business analytic and problem-solving techniques with powerful training in programming, system analysis and design and database management.

A HISTORY OF LOOKING FORWARD

Since 1971 A&M-Central Texas has progressed from its humble beginnings as American Technological University to become a shining star in The Texas A&M University System. As a member of one of the largest higher education systems in the nation, we have access to extensive resources and support for our students.
