COURSE REQUIREMENTS

There will be a variety of graded and non-graded activities throughout the semester. Each activity will assess your command of the material as well as your understanding of the course goals and concepts. Activities are assigned and completed during the class period unless otherwise noted and cannot be turned in late or if classes are missed.

Chapter Summary Papers

Each chapter, the student will be required choose one topic from the chapter and perform a literature review using the top 40 accounting journals (not including the top five practitioner journals) identified in Hasselback et al. 2012, “Benchmarking the Research Productivity of Accounting Doctorates,” (*Issues in Accounting Education*). This review should include at least 4 articles from the past 5 years. In a written summary of approximately 700 to 1,000 words (roughly about 2 double-spaced pages, not including references page(s) in APA format, Times Roman 12-point font), the student should discuss the literature, identify theories used, present key findings, and provide at least 5 questions for future research.

Individual PowerPoint Presentations

Each chapter, the student will be required develop a PowerPoint presentation of his/her chapter summary papers and present to the class (10 min – max).

Literature Review

Each student will identify, read, and analyze appropriate research articles to write an 10 to 15 page literature review on a current topic in accounting (for submission to the NAAAS or 2020 Southwest AAA Regional Meeting). Further instructions will be given in class. In order to help you stay on a targeted timeline in preparing your literature review, several benchmarks will be defined. A review of literature presents a synthesis of existing theory and literature that argues for the research question(s)/hypotheses that you are putting forward. The process of constructing a literature review acquaints the researcher with the studies already done in a particular area and allows the researcher to extend existing knowledge. The key to writing a good literature review is synthesis.

Assignment Guidelines:

- I. Work on your research questions and/or hypothesis(es). You may have a question in mind or find a gap in existing literature.
- II. Be sure you pose a question/hypothesis that is new; your study must propose to add to/refine our current knowledge.
- III. Be sure you have gathered adequate research. Avoid using direct quotations. Instead, you should paraphrase ideas – this will help you synthesize the material. Use the articles you read as evidence to support assertions/statements that you formulate in your own words!! You will need to read more material than you cite in your review. You must have about 10 to 12 sources referenced and synthesized in your review. An “A” paper will use 10 - 12 communication sources expertly.
- IV. The paper must have a clear structure – don’t fall into the trap of “listing” articles and summarizing their findings! Remember, this is an argument in favor of your proposed research question/hypothesis. (Consider organizing your paper in a “general to specific”, “chronological”, “thematic” or “known to unknown” funnel pattern.)
- V. Write the paper following APA guidelines. Points will be deducted for errors in formatting and failure to adhere to APA guidelines!
- VI. The review needs to include the following components.
 - a. APA Style formatted title page
 - b. Introduction—including a strong thesis that gives a roadmap to the paper.
 - c. Review of current literature on topic that begins with broad/general concepts and becomes gradually more and more specific.
 - i. You may want to think of the paper as “funnel” that starts broad and gradually narrows, until you propose your specific RQ or Hypothesis.
 - ii. Use APA Style headings and subheadings to organize your paper and help provide clear structure.
 - d. Propose RQs /hypothesis that emerge logically and clearly from your literature review.
 - e. The RQs/ hypothesis must include the variables that are set up in your literature review and SHOULD NOT introduce “new” ideas or variables.

- f. Reference Page using APA Style (only articles specifically referenced in the review ought to be cited).

The ideal (read A) literature review will clearly present all of the information above. It will address the research paradigm, theory and methods that are discussed in the literature in a clear and concise argument. The literature review will contribute to accounting scholarship in new and interesting ways. Finally, the ideal paper will be error free. It will make full use of APA Manual of Style in areas of spelling, grammar, citations, and style.

OPTIONAL POLICY STATEMENTS

A Note about Sexual Violence at A&M-Central Texas

Sexual violence is a serious safety, social justice, and public health issue. The university offers support for anyone struggling with these issues. University faculty are mandated reporters, so if someone discloses that they were sexually assaulted (or a victim of Domestic/Dating Violence or Stalking) while a student at TAMUCT, faculty members are required to inform the Title IX Office. If you want to discuss any of these issues confidentially, you can do so through Student Counseling (254-501-5955) located on the second floor of Warrior Hall (207L).

Sexual violence can occur on our campus because predators often feel emboldened, and victims often feel silenced or shamed. It is incumbent on ALL of us to find ways to actively create environments that tell predators we don't agree with their behaviors and tell survivors we will support them. Your actions matter. Don't be a bystander; be an agent of change. For additional information on campus policy and resources visit the [Title IX webpage](https://www.tamuct.edu/departments/compliance/titleix.php) [https://www.tamuct.edu/departments/compliance/titleix.php].
