### 3.0 Ethics

Students are expected to conduct themselves in a professional and ethical manner at all times. They are expected to maintain confidentiality of all information related to clients, as well as all information related to cases presented in practicum/internship classes. This is the student's responsibility regardless of procedures in place at the site. Students are responsible to know and follow legal and ethical confidentiality practices of the field placement site, as well as applicable codes of ethics. Knowledge of HIPAA and/or FERPA is expected. In addition, students shall not use any client identifying information in any practicum/internship documentation, including tapes. Students shall secure tapes and other client information that may be necessary for class in a way that is secure, legal, and ethical. Tapes, transcripts, case studies, or other client information used for class shall be destroyed in an appropriate manner (i.e., shredding) as soon as they have been evaluated unless it is the policy of the site to maintain and secure all tapes. Any questions regarding confidentiality must be discussed with the university instructor as well as the site supervisor.

Committing an ethical violation during practicum/internship would have academic consequences. At minimum, the supervisor's evaluation (which includes an ethics component) will reflect the ethical violation(s). Depending on the severity of the violation, the student's response to becoming aware of the violation, and other circumstances, an ethical breach could potentially result in failure of the course.

All students must have appropriate liability insurance for the duration of their practicum experience or their hours will not be counted.
