Course Overview and description:  
This course extends the principles of finance in the international context. International finance differs from the purely domestic version in two important ways. First, the existence of multiple currencies whose exchange rates float more or less freely in response to market forces is a source of additional complication to investment and financing decisions. Second, since multinational corporations operate across the borders of sovereign states, national tax, regulatory, and political regimes have an effect on corporate decision-making. The first part of the course is an overview of the global financial environment and an introduction to exchange rate behavior. The second part of the course focuses on the theory of the firm in an international setting, with emphasis on the problems of managing foreign exchange exposure.

Student-instructor and student-student interaction:  
I will be checking email several times a day, except Weekends. I will attempt to respond to your messages in 24 hours or less. Emails sent Saturday will receive a response no later than Monday night. Use this asynchronous medium of communication as often as needed to ask questions and also to share ideas, perspectives, and experiences with the instructor.

Course Objective:  
Students who successfully complete this course should be able to: explain the fundamental types of financial assets including their basic characteristics, valuation, and their pros/cons as sources of financing (capital); evaluate a firm’s financial performance using its financial statements; evaluate financial alternatives from a time value of money perspective; evaluate the risk/return characteristics of different financial decisions; conduct a thorough firm-level financial analysis; demonstrate a thorough financial literacy; demonstrate proficiency using a financial calculator.
Student Learning Outcomes (SLO):

1. Explain the effect of currency changes as well as surpluses and deficits in the current and capital accounts of a nation’s balance of payments.
2. Demonstrate an understanding of the factors that cause currencies to fluctuate in value.
3. Demonstrate an understanding of the impact currency fluctuations have on corporate profitability and operating procedures.
4. Identify appropriate instruments and techniques that corporations can use to hedge currency risk such as options, forward contracts, future contracts, natural hedging and swaps.
5. Analyze the effect of disequilibrium in the market and propose appropriate arbitrage strategies.
6. Explain the advantages and disadvantages of fixed versus floating exchange rate regimes.
7. Demonstrate an understanding with various governmental techniques for intervention in currency markets and analyze the likely effectiveness of such interventions in the short and long run.
8. Demonstrate an understanding of international parity conditions and calculate the impact of incremental changes in inflation, interest rates and currency levels on various macroeconomic variables.
9. Calculate gain and losses from engaging in option transactions.

COVID-19 SAFETY MEASURES
To promote public safety and protect students, faculty, and staff during the coronavirus pandemic, Texas A&M University-Central Texas has adopted policies and practices to minimize virus transmission. All members of the university community are expected to adhere to these measures to ensure their own safety and the safety of others. Students must observe the following practices while participating in face-to-face courses, course-related activities (office hours, help sessions, transitioning to and between classes, study spaces, academic services, etc.) and co-curricular programs:

Self-monitoring—Students should follow CDC recommendations for self-monitoring. Students who have a fever or exhibit symptoms of COVID-19 should participate in class remotely and should not participate in face-to-face instruction. Students required to quarantine must participate in courses and course-related activities remotely and must not attend face-to-face course activities. Students should notify their instructors of the quarantine requirement. Students under quarantine are expected to participate in courses and complete graded work unless they have symptoms that are too severe to participate in course activities.

Face Coverings—Face coverings must be worn inside of buildings and within 50 feet of building entrances on the A&M-Central Texas Campus. This includes lobbies, restrooms, hallways, elevators, classrooms, laboratories, conference rooms, break rooms, non-private office spaces, and other shared spaces. Face coverings are also required in outdoor spaces where physical distancing is not maintained. The university will evaluate exceptions to this requirement on a case by case basis. Students can request an exception through the Office of Access and Inclusion in Student Affairs.

If a student refuses to wear a face covering, the instructor should ask the student to leave and join the class remotely. If the student does not leave the class, the faculty member should report that student to the Office of Student Conduct. Additionally, the faculty member may choose to teach that day’s class remotely for all students.

Physical Distancing—Physical distancing must be maintained between students, instructors, and others in the course and course related activities.

Classroom Ingress/Egress—Students must follow marked pathways for entering and exiting classrooms and other teaching spaces. Leave classrooms promptly after course activities have concluded. Do not congregate in hallways and maintain 6-foot physical distancing when waiting to enter classrooms and other instructional spaces.

The university will notify students in the event that the COVID-19 situation necessitates changes to the course schedule or modality.
