Semester: Spring 2020
Instructor’s Name: Claudia Rappaport, PhD, ACSW, MSSW
Office Number: 420D Warrior Hall
Office Phone: (254) 519-5432
E-Mail: rappaport@tamuct.edu. NOTE: ONLY USE THIS ADDRESS TO EMAIL ME; DO NOT TRY TO EMAIL ME THROUGH THE CANVAS SYSTEM! Emails are responded to as soon as possible, usually the same day (or the next day if sent very late at night). I do respond to emails at night if I am still up grading papers.

Office Hours: Mondays and Wednesdays, 1:00 to 2:00 and 4:00 to 5:00 PM; Tuesdays and Thursdays, 2:00 to 5:00 PM

I. Course Description

Catalog Description: Provides an opportunity to explore issues related to human biological functioning as applied to social work practice. Emphasis is placed on functioning of the human body across the lifespan, on healthy living and prevention of illness, and on illness and disabilities (physical and mental) that social workers encounter in clients.

Prerequisites: There are no prerequisites for this class.

II. Nature of Course

This course will provide students an opportunity to explore issues related to human biological functioning as applied to social work practice. Emphasis will be placed on such topics as: the functioning of the human body across the lifespan; illnesses and disabilities that social workers frequently encounter in clients; genetics and heredity; human sexuality; mental disorders and substance abuse and their treatment; the influence of environment on the human body; and healthy living and the prevention of illness. The course content will supplement course content in HBSE I and HBSE II. Ethical and cultural aspects of these topics will also be explored.

This supports students’ learning the model of Generalist Social Work Practice: Work with individuals, families, groups, communities and organizations in a variety of social work and host settings. Generalist practitioners view clients and client systems from a strengths perspective in order to recognize, support, and build upon the innate capabilities of all human beings. They use a professional problem-solving process to engage, assess, broker services, advocate, counsel, educate, and organize with and on behalf of clients and client systems. In addition, generalist practitioners engage in community and organizational development. Finally, generalist practitioners evaluate service outcomes in order to continually improve the provision and quality of services most appropriate to client needs. Generalist social work practice is guided by the NASW Code of Ethics and is committed to improving the well-being of individuals, families, groups, communities and organizations and furthering the goals of social justice. (From the website of the Association of Baccalaureate Social Work Program Directors, Inc.)
Teaching Method: The primary teaching approaches in this course will be collaborative and active learning. Material in the course will be presented through interactive class discussions on readings, analysis of case scenarios, and videotapes.

Grading: As much as possible, Dr. Rappaport tries to return graded assignments the class after they were due. For longer assignments it may be the second class after they were due. Twice during the semester Dr. Rappaport will complete grade sheets to show each student where their course grade stands at that time.

Note: Handouts for the course will be available via the Canvas Online Learning system. Please ensure that you have access to it. For concerns, please contact the Help Desk Central, 24 hours a day, by using the Canvas Help link located at the bottom of the left-hand menu. Select Chat with Canvas Support, submit a support request through “Report a Problem,” or call the Canvas support line at 1-844-757-0953.

III. Department Mission
The mission of the Texas A&M University-Central Texas Bachelor of Social Work Department (TAMUCT BSW Department) is to prepare high quality graduates for entry-level generalist social work practice and for advanced education. This education is delivered in a rigorous and student-centered learning environment that promotes professional behavior, values, and ethics, human and community well-being, respect for human diversity, and a global perspective, and is guided by a person-in-environment framework, knowledge based on scientific inquiry, and social work competencies.

The TAMUCT Social Work Department has full accreditation through the Council on Social Work Education (CSWE), effective February 2017.

IV. COURSE OBJECTIVES AND RELATED PRACTICE BEHAVIORS
This course provides content that helps to prepare you, the student, to engage in the following CSWE competencies and related practice behaviors:

- Attend to professional roles and boundaries (2.1.1c)
- Distinguish, appraise, and integrate multiple sources of knowledge, including research-based knowledge and practice wisdom (2.1.3a)
- Utilize conceptual frameworks to guide the process of assessment, intervention, and evaluation (2.1.7a)
- Critique and apply knowledge to understand person in environment (2.1.7b)
- Collect, organize and interpret data (2.1.10b[d])
- Assess client strengths and limitations (2.1.10b[e])
- Select appropriate intervention strategies (2.1.10b[g])
- Implement prevention interventions that enhance client capacities (2.1.10c[i])

The objectives for this course that support the CSWE-related practice behaviors are:

1. Express a basic understanding of scientific frameworks in human biology and their importance to professional social work practice.
2. Apply understanding of human biological functioning in development of client assessments.
3. Utilize understanding of scientific frameworks and human biology to develop/recommend appropriate interventions and prevention services.
4. Apply understanding of systems/ecological framework on human biological functioning.

The following table shows the relationship between A) the course objectives, B) the CSWE-related practice behaviors, and C) the assignments used to assess students’ ability to fulfill the objective related to the practice behavior:
A. Objectives  
(By the completion of the course, it is expected that you will be able to...)  

<table>
<thead>
<tr>
<th>Class discussions</th>
<th>Quizzes/exams</th>
<th>Case scenarios</th>
<th>Observation essay</th>
<th>Movie essay</th>
</tr>
</thead>
</table>

B. CSWE-Related Practice Behaviors  
(This is the behavior that objective supports)  

(1) Express a basic understanding of scientific frameworks in human biology and their importance to professional social work practice.  
2.1.1c 2.1.3a  

(2) Apply understanding of human biological functioning in development of client assessments.  
2.1.7a 2.1.10b(d),(e)  

(3) Utilize understanding of scientific frameworks and human biology to develop/recommend appropriate interventions and prevention services.  
2.1.10b(g) 2.1.10c(i)  

(4) Apply understanding of systems/ecological framework on human biological functioning.  
2.1.7b  

C. Course Assignments  
(The assignment is used to assess your ability to fulfill the objective related to the practice behavior)  

V. Course Requirements  

There will also be readings assigned in handouts for each class period. Handouts are largely based on the following sources:  

B. Final Grades

A total of 10,000 points can be earned from the course assignments, as follows:

<table>
<thead>
<tr>
<th>Course Assignment</th>
<th>Percentage of final grade</th>
<th>Total possible points</th>
</tr>
</thead>
<tbody>
<tr>
<td>Concept Mastery Quizzes</td>
<td>20%</td>
<td>2,000</td>
</tr>
<tr>
<td>Case scenario assignments</td>
<td>20%</td>
<td>2,000</td>
</tr>
<tr>
<td>Individual Interview Paper</td>
<td>15%</td>
<td>1,500</td>
</tr>
<tr>
<td>Movie assignment</td>
<td>15%</td>
<td>1,500</td>
</tr>
<tr>
<td>Mid-term Exam</td>
<td>10%</td>
<td>1,000</td>
</tr>
<tr>
<td>Final Exam</td>
<td>10%</td>
<td>1,000</td>
</tr>
<tr>
<td>Attendance</td>
<td>5%</td>
<td>500</td>
</tr>
<tr>
<td>Class Participation</td>
<td>5%</td>
<td>500</td>
</tr>
<tr>
<td>Totals</td>
<td>100%</td>
<td>10,000</td>
</tr>
</tbody>
</table>

(Total points ÷ 100 = final grade)

Final Class Grades are based on the following:

A: 90 to 100 (9,000 to 10,000 points)  B: 89 to 80 (8,900 to 8,000 points)
C: 79 to 70 (7,900 to 7,000 points)  D: 69 to 60 (6,900 to 6,000 points)
F: 59 or less (5,900 points or less)

Example: A test worth 15% of the grade, on which a student earned a B+, would give 1,320 points toward the final grade (88 x 15 = 1,320).

Final Class Grades are based on the following:

A: 90 to 100 (9,000 to 10,000 points)  B: 89 to 80 (8,900 to 8,000 points)
C: 79 to 70 (7,900 to 7,000 points)  D: 69 to 60 (6,900 to 6,000 points)
F: 59 or less (5,900 points or less)

As much as possible, graded papers are returned the class after they are handed in. Two to three times during the semester, students will be given a grade sheet to show the status of their grade at that point in the course.

C. Course Assignments
The following activities will be completed during the semester.

1. **Concept Mastery Quizzes (20% of final grade)**
   Many of the class periods will include a quiz to help students solidify their understanding of the concepts presented in the course material and learn how to apply them. The quiz will typically be given at the end of class as a take-home quiz, and it is due at the beginning of the next regularly scheduled class period. **A student who misses class will be allowed to submit a make-up quiz; however, it is the student’s responsibility to pick up the quiz from Dr. Rappaport and turn it in by the class period in which it is due (typically the next scheduled class period). If the student does not do this, then a make-up quiz will not be accepted.** **DO NOT ASK FOR A COPY OF THE QUIZ AFTER STUDENTS HAVE ALREADY TURNED IT IN!**

   At the end of the course, the student’s average numerical grade on all quizzes (including any zeros) will represent 20% of their final grade. Each student will have one quiz grade (the lowest one) dropped by the professor; if you only missed a single class during the semester, that zero will not impact your average quiz grade.

   **Note:** Take-home quizzes must be completed by each student ALONE. There is to be NO sharing of quiz answers with other students; this constitutes cheating. If a student shares their quiz answers with another student, BOTH students will receive a grade of 0 (zero) on that quiz.

2. **Case scenario assignments (20% of final grade)**
   In some class periods, students will be given client scenarios that apply some of the material being covered by the course in terms of how social workers would provide services to the person whose story is told in the scenario. The case scenario assignments will be given as take-home exercises and are due at the beginning of the next regularly scheduled class period. Each scenario will have particular questions the student needs to respond to in writing. The purpose of the scenario is to help students consider social work applications of the aspects of human biological functioning that are being studied. The grade will be based on how comprehensive the student’s answer is, so responses should be as thorough and thoughtful as possible. **Students are not allowed to use ANY outside sources or the internet while writing their answers. The ONLY sources that can be referred to are the course’s assigned readings, and students are NOT to simply copy those readings in their answer. Your focus should be on APPLYING what you read while responding to a client’s situation. If it is apparent to the professor that outside sources were used, the student’s grade on the assignment will be a zero. Even though only course materials are being used as references, you still need to use appropriate citations in the case scenarios. SCENARIOS MUST BE TYPED AND DOUBLE-SPACED OR THEY WILL NOT BE GRADED. HAND-WRITTEN SCENARIOS ARE NOT ALLOWED.**

   At the end of the course, the student’s average numerical grade on all the case scenarios (including any zeros if the student missed some scenarios due to absence) will represent 20% of their final grade. Make-up work will follow the same policy as explained above in the section on quizzes. Dates of scenarios are listed in the syllabus. Toward the end of the course, two extra (optional) case scenarios will be given. Students who choose to complete those extra assignments can apply the grades to replace the grades of two previous case scenarios or previous quizzes, whichever will help their final grade most.

3. **Movie Assignment (15% of final grade)**
   Each student will select one movie to watch that deals with some of the issues of human biological functioning and their psychosocial implications that we have been studying in this class. This should be a full-length movie (which usually run between 1 hour and 20 minutes and 2 hours). It can be a movie on television or a movie that has been shown in theatres and/or that is available for rental or from libraries. **It cannot be a movie that we use in class; if you DO write your paper on a movie we use in the class, your paper will not**
be graded, and you will receive a grade of zero. After watching the movie, the student will write a 6 to 8 page paper covering the following:

- A summary (NO MORE THAN three pages in length) of the main storyline, stressing ONLY the parts of the story that dealt with human functioning, health, illness, and disability. What was the physical condition, and how was it explained in the movie? How did the physical or medical condition affect the main character and/or their family, friends, and other significant people? Were their perceptions of the condition more in line with a chronic illness or with a disability? DO NOT SIMPLY WRITE A SCENE-BY-SCENE RETELLING OF THE MOVIE!!! The summary CANNOT be more than 3 pages and should ONLY address how the movie presented issues related to the mental/biological condition, though giving enough of a summary that the story will make sense to the reader.

- How the movie provided examples of material that we have studied in this class, and whether there were things shown in the movie that contradicted what we have studied. BE SURE YOU DEFINE OR EXPLAIN ANY MEDICAL, BIOLOGICAL, OR PSYCHOLOGICAL TERMS YOU USE IN YOUR PAPER.

- How would a social worker have been able to assist the people in the movie? What would the major kinds of assistance have been, and how could they potentially have changed what occurred in the movie?

- If there was a social worker (or psychologist, psychiatrist, counselor, etc.) in the movie, how effective do you think that person’s services were? How do you think they could have been made more effective?

- Were any ethical dilemmas raised by the movie, and how would the social work Code of Ethics have guided social workers regarding how to resolve those dilemmas? THE CODE OF ETHICS IS THE ONLY NON-COURSE MATERIAL YOU NEED TO USE AS A REFERENCE IN YOUR PAPER; BE SURE TO CITE THE CODE IN THIS PART OF YOUR PAPER.

In writing your answers to these questions, be sure you are very clear and complete in describing what happened in the movie because this might be a movie I have not seen. Even if it is a movie I have seen, you will lose points if you are not clear in your descriptions of the issues in the movie and what you would have done about them (I pretend I have never seen the movie when I grade how well you described its content). Papers will be graded according to how well the student addresses these questions. Thoroughness and creativity are encouraged. Papers must be typed and double-spaced (if they are not, the paper will not be graded and you will receive a zero for the assignment), and you must use APA format. STUDENTS ARE NOT ALLOWED TO USE ANY REFERENCE MATERIALS OTHER THAN THE COURSE READING ASSIGNMENTS (INCLUDING ANY SOURCES DESCRIBING THE MOVIE), BUT YOU STILL NEED TO CITE ANY USE OF READING ASSIGNMENTS IN YOUR ESSAY, AS WELL AS CITING THE MOVIE YOU WATCHED. IF YOU USE OTHER OUTSIDE MATERIALS, EVEN IF YOU CITE THEM, YOUR GRADE ON THE ASSIGNMENT WILL BE A ZERO BECAUSE YOU DID NOT FOLLOW INSTRUCTIONS. See the APA section of this syllabus if you do not know how to cite a movie correctly in a paper. See also the rubric in this syllabus as a guideline for how the paper will be graded.

4. Individual Interview Paper (15% of final grade)
Each student will arrange to spend two hours with a person who has some kind of medical or psychological disorder to observe and interview him/her. The person can be an adult or a child (if a child, you will also need to spend time interviewing a parent or caregiver). The person you choose cannot be a relative of the student (and relative is defined as any person related by blood, marriage, or co-habitation) but can be someone you already know, or they can be a person you are meeting for the first time to do this assignment. After spending the time with this person, you will write an 8-10 page essay (it must be this length or there will be serious deductions, and the page length counts content only, not the face page or the reference page) describing what you observed in the person and what they told you about their condition and their life situation. You will then
compare this person’s story with the material you studied for class about a person who has that kind of condition, and actually utilize that material to help explain the story of the person you interviewed. The course material should be blended in with the person’s story in a smooth, explanatory fashion. How was this person’s story similar to the material you studied for class about that condition, and were there things about the person that appeared to be different from the material you studied? Be sure you give biological explanations for everything you discuss (for example, if you say the person had an MRI done, you need to explain what an MRI does and what it is used for). You should approach writing the essay from the body systems perspective we have used in the course – what body systems are being affected by their condition, and how are they being affected? What kinds of medical or psychological care have they required because of the condition, and how effectively has that care helped them? Have they used any types of alternative treatments in addition to standard medical/psychological care? How has the condition affected the person’s daily life, and has it affected their ability to function in ways that are important to them? Has the condition affected their family’s functioning? What kinds of adaptations has the person made to help them function more effectively? What is their perception of their condition, and how does it illustrate Falvo’s descriptions of chronic illness and disability? What is their view of the future with this condition?

At the beginning of the essay, be sure you give the person’s age and a description of the environment in which you did the observations and interview (were you in the person’s home? in a hospital? in a nursing home? at a school? eating in a restaurant? etc.). You need to make up a name for the person, using a fictional name for purposes of confidentiality, and you need to state that you are using a fictional name. Papers must be typed and double-spaced (if they are not, they will not be graded and you will receive a zero on the assignment) and must use APA format. Students are not allowed to use any reference materials other than the course reading assignments and the code of ethics, but you still need to cite correctly any use of reading assignments in your essay, along with using personal communication citations when discussing your interview of the person. (See the APA section of this syllabus if you do not know how to do that.) If you use other outside materials, even if cited, your grade will be reduced significantly because you did not follow instructions. Creativity and thoroughness are significant aspects of the grading of this essay; if it is shorter than 8-10 pages, it is not in depth enough in terms of telling the person’s story and comparing their story to class materials, and your grade will be reduced significantly.

See the rubric for grading this paper later in this syllabus.

Note: On both of the written paper assignments (the movie paper and the interview/observation essay), 75% of the essay grade will be based on content, and 25% of the grade will be based on punctuation, spelling, grammar, APA format, organization, etc., as follows:

<table>

7
5. **Mid-Term and Final Exams: 20% of final grade total (10% each)**

There will be two take-home examinations given in this course, a mid-term and a final. See the Course Schedule in this syllabus for exam dates. Examinations will not be the type of exams students might be used to (such as multiple choice, true-false, matching, and short essay questions). That type of examination merely expects students to repeat back facts and definitions, and the concept mastery quizzes will be verifying your ability to answer those kinds of questions. Instead, the exam may ask one or two large questions that expect the student to demonstrate his/her ability to integrate the learning they have done in the class (from reading, class discussions, watching videos in class, etc.) and show how they can APPLY that knowledge in performing social work functions. **SINCE THESE ARE TAKE-HOME EXAMS, THEY MUST BE TYPED AND DOUBLE-SPACED. HAND-WRITTEN EXAMS WILL NOT BE ACCEPTED.**

6. **Class Attendance (5% of final grade)**

Students are expected to be present for every scheduled class session. If you are unable to avoid missing a class, you must email the professor **within one week of the class period** to explain the absence if you want it to be considered an excused absence. Every unexcused (or unexplained) absence will affect this portion of your grade. For example, an illness, doctor appointment, or funeral of a family member is an excused absence; the professor also allows one day’s absence if a deployed significant other returns home. You need to email about every absence from class; for example, if you were sick both days of the week, one email for the first day will not suffice as the professor will not assume that you were still sick on the second day. The professor will review other types of absences to determine how unavoidable they were; not being able to leave work is NOT an excused absence. If your work schedule or your health will not permit you to attend this class on a predictable basis, you should not try to take the class. **NOTE: if you do not email the professor within one week of the absence to get it excused, this will NOT be changed later to an excused absence.**

Students must be present when class begins and are expected to remain until class is dismissed; students are not allowed to arrive late or leave early. In addition, to be counted as present, you must demonstrate attentiveness and engagement in all the class activities. Any student found sleeping or doing work for another class will have their attendance for that day changed to “absent”.

The following shows the degree to which unexcused absences will impact your attendance grade.

<table>

<tr>
<td>Coming to class late twice counts as one absence</td>
<td></td>
</tr>
</tbody>
</table>

**Class Participation (5% of grade)**

Dr. Rappaport has an interactive teaching style and expects every student to be an active participant in class. An old Chinese proverb says, “Tell me and I will forget–Show me and I may remember–But involve me and I will understand.” You will learn more from this class if you talk and participate. Ask questions, remembering that there is no such thing as a stupid question. Share your reactions to what is being discussed. Reflect on implications of what we are studying. If you are a student who has never before chosen to talk in classes, this will be a good opportunity for you to start developing a new life skill that will serve you well in the profession of social work. (Students are encouraged not to divulge any personal information they will not be comfortable
having their fellow students know about them.) Being an active participant increases understanding of the material for your fellow students as well.

Your class participation grade will be determined by whether you talked during class discussions and by whether your contributions added to the quality of the class sessions. Dr. Rappaport also reserves the right to call on students in class if they are not participating regularly in the discussions. Each day a student will earn between 0 and 3 participation points; the points will be totaled at the end of the semester, and grades will be determined based on the student’s total number of points compared to the points of all the other students in the class.

VI. CODE OF CONDUCT FOR CLASSROOMS

The following policies apply to all students enrolled in this course:

1. Students are not permitted to enter class more than ten (10) minutes late. Exceptions will be made with prior discussion and approval by the professor only.

2. After class has begun, students are expected to remain for the duration of the class. It is expected that all students will take care of personal affairs (i.e., get beverages, take care of phone calls, meet with students and other professors, use the restroom, etc.) before class begins and that they WILL NOT leave class after it has begun.

3. AT THE BEGINNING OF EACH CLASS, ALL TELEPHONES MUST BE PUT AWAY FOR THE DURATION OF THE CLASS. THIS INCLUDES NOT PUTTING IT ON THE STUDENT’S DESK WHERE IT IS VISIBLE. IF DR. RAPPAPORT SEES A TELEPHONE ON A DESK OR SEES A STUDENT TRY TO ANSWER ONE, SHE RESERVES THE RIGHT TO CONFISCATE IT FOR THE REMAINDER OF THE CLASS.

IN ADDITION, USE OF LAPTOP COMPUTERS IS PROHIBITED DURING CLASS EXCEPT FOR ACCESSING THE TEXTBOOK OR CLASS HANDOUTS. IF A STUDENT IS SEEN DOING A LOT OF TYPING, DR. RAPPAPORT RESERVES THE RIGHT TO SEE WHAT IS BEING WRITTEN, AND IF NECESSARY SHE WILL REMOVE THE STUDENT’S RIGHT TO USE THE LAPTOP DURING CLASS. UNDER NO CIRCUMSTANCES CAN A STUDENT USE THIS CLASS PERIOD TO WORK ON ASSIGNMENTS FROM THIS OR ANY OTHER CLASS.

IN OTHER WORDS, STUDENTS NEED TO PAY CLOSE ATTENTION TO EACH CLASS IN ITS ENTIRETY, INCLUDING ANY VIDEOTAPES BEING SHOWN, AND TO USE THEIR INTEGRITY AND RESPECTFULNESS IN HOW THEY BEHAVE DURING CLASS.

3. Students are expected to display professional decorum at all times. This includes, but is not limited to, respecting classmates and the instructor. It is expected that students will not speak to/hold conversations with/pass notes to other students, use cell phones, or engage in other types of unprofessional behaviors after class has begun. Talking during class discussions out of turn or while other students are talking is disruptive to the learning environment, disrespectful to peers,
and unprofessional in demeanor. Students are strongly encouraged to engage in discussion in a respectful and appropriate manner; hence, it is expected that students apply classroom etiquette and raise a hand if there is something you want to share or you want to answer a question. It is also expected that students will display patience in raising a hand and recognize that the professor may be trying to call on other students who have not yet participated.

4. To support the academic learning environment, students are asked to refrain from sharing personal information in class that will not support/add significantly to the class discussion. Sharing of personal stories and/or issues that are not directly related to the topic can distract class learning and limit knowledge-sharing by the professor and other students. The professor reserves the right to redirect/limit such conversations in class as needed.

5. Students are NOT permitted to work collaboratively (together) on any assignment in this class. All work turned in must be the student’s own product. This includes take-home quizzes, papers, etc. Failure to adhere to this policy can result in a zero (0) on the assignment and referral to Student Affairs for academic integrity concerns.

6. **All assignments must be turned in at the beginning of class on the day they are due.** Being absent from class on a day when an assignment is due does NOT grant a student an extension to the due date; the student must still arrange to get that assignment turned in to the professor before class starts. Allowing students to turn in assignments late for a grade is not fair to other students who get their work done on time, disrupts the grading process for the professor, and sends a message that such behavior is professionally “okay,” which it is not.

7. All papers submitted for grading MUST adhere to APA 6th edition standards unless otherwise stated by the professor. This means that all papers must, minimally, be: 1) typed, 2) double-spaced, 3) use Times New Roman font, 4) use 12 point font, 5) include an APA style cover page, and 6) include in-text citations AND a reference page for ANY SOURCED INFORMATION (this includes information learned in current or previous classes, read online, learned during a personal communication, reviewed over email, read in a textbook, etc.). Further, all typed papers submitted in class MUST be stapled. **IF A PAPER IS NOT WRITTEN IN APA FORMAT, DR. RAPPAPORT RESERVES THE RIGHT TO RETURN IT TO THE STUDENT WITH A GRADE OF ZERO. USING APA IS NOT OPTIONAL! IF YOU DO NOT KNOW HOW TO USE APA, READ THROUGH THE INSTRUCTIONS LATER IN THIS SYLLABUS OR GO TO THE WRITING CENTER AND ASK FOR SOME TUTORING ON HOW TO USE IT.**

8. TAMUCT expects all students to maintain high standards of personal and scholarly conduct and to avoid any form of academic dishonesty. Academic dishonesty includes, but is not limited to, plagiarism (intentional or unintentional), copying another person's work (INCLUDING THE TEXTBOOK OR OTHER COURSE MATERIALS), turning in someone else's work as your own, downloading material from the internet and inserting it into a paper as if it were your own work, taking ideas from classes or readings and putting them in a paper without
citations/references, cheating on an examination or other academic work, collusion, and the
abuse of resource materials. Any idea, even paraphrased ideas, used or borrowed must be given
credit by showing the source with an appropriate citation and reference. **Any student who
violates class and/or university policies regarding Academic Honesty will be sanctioned.**
More information on university policies can be found at tamuct.edu/studentconduct.

9. Class discussions, oral presentations, and written materials must adhere to professional standards
of expression and conform to the style described by the American Psychological Association
(APA). This includes avoidance of the use of language that degrades women; people of color;
people who are gay, lesbian, bisexual, or transgender; and other diverse and at-risk populations.
All students are expected to display the utmost respect for all people, regardless of differences.

10. **An assessment of each student’s behavior as it relates to class policies and overall decorum required by
the TAMUCT Social Work Department and the university is provided via the “Rubric for Assessing
Professional Behaviors”** that is given to students at the New Social Work Student Orientation. **All
social work majors receive a RAPB when they apply to the social work major and again when they
apply for a field placement. Failure to obtain scores of 3 or 4 in any of the 15 professional behavior
areas listed in the rubric will limit a student’s ability to be admitted to the social work major or
assigned to a field placement and/or can result in removal from a field placement. These behaviors,
which align with the National Association of Social Workers (NASW) core values and ethics, the
TAMUCT Code of Conduct, and the Social Work Department class policies, are considered the expected
professional behaviors of social work interns and future generalist social workers and, therefore, are
held to the strictest code.**

VII. University Policies

1. **Warrior Shield:**
Warrior Shield is an emergency notification service that gives TAMUCT the ability to communicate
health and safety emergency information quickly via email, text message, and social media. All students
are automatically enrolled in it through their myCT email account. Connect at portal.publicsafetycloud.net/Account/Login to change where you receive your alerts or to opt out. By
staying enrolled in Warrior Shield, university officials can quickly pass on safety-related information,
regardless of your location.

2. **Technology Requirements:**
This course will use the TAMUCT Instructure Canvas learning management system to deliver
handouts as supplemental reading assignments. We strongly recommend using the latest versions of
Chrome or Firefox browsers, not Internet Explorer.

3. **Drop Policy**
If you discover that you need to drop this class, you must go to the Records Office and ask for the
necessary paperwork. Professors cannot drop students; this is always the responsibility of the
student. The records office will give a deadline for when the form must be completed, signed, and
returned. After you return the signed form to the records office and wait 24 hours, you must go into
Warrior Web and confirm that you are no longer enrolled. If you are still enrolled, FOLLOW-UP
with the records office immediately. You are to attend class until the procedure is complete to avoid
penalties for absences. Should you miss the deadline or fail to follow the procedure, you will receive an F in the course if you stopped attending and doing the assignments.

4. **Academic Integrity**
Texas A&M University - Central Texas values the integrity of the academic enterprise and strives for the highest standards of academic conduct. TAMUCT expects its students, faculty, and staff to support the adherence to high standards of personal and scholarly conduct to preserve the honor and integrity of the creative community. Academic integrity is defined as a commitment to honesty, trust, fairness, respect, and responsibility. Any deviation by students from this expectation may result in a failing grade for the assignment and potentially a failing grade for the course. Academic misconduct is any act that improperly affects a true and honest evaluation of a student’s academic performance and includes, but is not limited to, cheating on an examination or other academic work, plagiarism and improper citation of sources, using another student’s work, collusion, and the abuse of resource materials. All academic misconduct concerns will be reported to the university’s Office of Student Conduct. Ignorance of the university’s standards and expectations is never an excuse to act with a lack of integrity. When in doubt on collaboration, citation, or any issue, please contact your professor before taking a course of action.

5. **For Pregnant and/or Parenting Students:**
TAMUCT supports students who are pregnant and/or parenting. In accordance with requirements of Title IX and related guidance from the US Department of Education’s Office of Civil Rights, the Dean of Student Affairs office can assist students in seeking appropriate accommodations. Students should seek assistance as early in the semester as possible. Visit Student Affairs (tamuct.edu/student-affairs/index.html) or contact the Title IX Coordinator. Title IX prohibits discrimination of the basis of sex and gender, including pregnancy, parenting, and all related conditions. Contact the Associate Dean in Student Affairs at 254-501-5908.

6. **Academic Accommodations**
At Texas A&M University – Central Texas, we value an inclusive learning environment where every student has an equal chance to succeed and has the right to an education that is barrier-free. The Dept. of Access and Inclusion is responsible for ensuring that students with a disability receive equal access to the University's programs, services and activities. If you believe you have a disability requiring reasonable accommodations, please contact the Department of Access and Inclusion at (254) 501-5831. Any information you provide is private and confidential and will be treated as such. For more information, please visit our webpage: [http://www.tamuct.edu/student-affairs/access-inclusion](http://www.tamuct.edu/student-affairs/access-inclusion).

TAMUCT supports students who are pregnant and/or parenting. In accordance with requirements of Title IX and guidance from US Department of Education’s Office of Civil Rights, the Dean of Student Affairs’ office can assist students who are pregnant and/or parenting in seeking accommodations related to pregnancy and/or parenting; contact them at 254-501-5909. For more information, please visit [www.tamuct.departments/index.php](http://www.tamuct.departments/index.php). Students may also contact our Title IX Coordinator. If you would like to read more about these requirements and guidelines online, please visit the website [www2.ed.gov/about/offices/list/ocr/docs/pregnancy.pdf](http://www2.ed.gov/about/offices/list/ocr/docs/pregnancy.pdf).

7. **Library Services**
The university library provides many services in support of research across campus and at a distance. We offer over 200 electronic databases containing approximately 250,000 ebooks and 82,000 journals, in addition to the 72,000 items in our print collection, which can be mailed to students who live more than 50 miles from campus. Research guides for each subject taught at TAMUCT are available through our website to help students navigate these resources. On campus, the library
offers technology including cameras, laptops, microphones, webcams, and digital sound recorders. Research assistance from a librarian is also available 24 hours a day through our online chat service and at the reference desk when the library is open. Research sessions can be scheduled for more comprehensive assistance and can take place on Skype or in person at the library. Assistance can cover many topics, including how to find articles in peer-reviewed journals, how to cite resources, and how to piece together research for written assignments. The library facility on campus includes student lounges, private study rooms, group work spaces, computer labs, family areas suitable for all ages, and many other features. Services such as interlibrary loan, TexShare, binding, and laminating are available. The library offers workshops tours, readings, and other events. For more information, visit the webpage: http://tamuct.libguides.com/

8. **Tutoring Services**
Tutoring is available to all TAMUCT student, both on-campus and online. On-campus subjects tutored include Accounting, Advanced Math, Biology, Finance, Statistics, Mathematics, and Study Skills. Tutors are available at the Tutoring Center in Warrior Hall, Suite 111. If you have a question regarding tutor schedules, need to schedule a tutoring session, are interested in becoming a tutor, or any other question, contact Academic Support Programs at 254-519-5836, visit Student Success in 212F Warrior Hall, or email studentsuccess@tamuct.edu. Chat live with a tutor 24/7 for almost any subject on your computer through tutor.com, an online tutoring platform that enables TAMUCT students to log in and receive FREE online tutoring. This tool provides tutoring in over 40 subject areas, **but it no longer offers writing support as of 8/1/19.** To access tutor.com, go to the “My Courses” tab in Blackboard.

9. **University Writing Center**
Located in 416 Warrior Hall, the University Writing Center is a free workspace open to all TAMUCT students from 10 AM to 5 PM Monday thru Thursday. Students can arrange a one-on-one session with a trained and experienced writing tutor by visiting the UWC during normal operating hours (both half-hour and hour sessions are available). Tutors are prepared to help writers of all levels and abilities at any stage of the writing process. While tutors will not write, edit, or grade papers, they will assist students in developing more effective composing practices. By providing a practice audience for students’ ideas and writing, tutors highlight the ways in which they read and interpret students’ texts, offering guidance and support throughout the various stages of the writing process. In addition, students can work independently in the UWC by checking out a laptop that runs the Microsoft Office suite and connects to WIFI, or by consulting our resources on writing, including all the relevant style guides (such as APA). Whether you need help brainstorming ideas, organizing an essay, proof-reading, understanding proper citation practices, or just want a quiet place to work, the University Writing Center is available for help. If you have any questions about it, contact Dr. Bruce Bowles, Jr., at bruce.bowles@tamuct.edu.

10. **Sexual Violence**
Sexual violence is a serious safety, social justice, and public health issue. TAMUCT offers support for anyone struggling with these issues. University faculty are mandated reporters, so if someone discloses that they were sexually assaulted (or a victim of domestic or dating violence or stalking) while a student at TAMUCT, faculty members are required to inform the Title IX office. If you want to discuss any of these issues confidentially, you can do so through Student Counseling (254-501-5955), located on the second floor of Warrior Hall (207L). It is incumbent on all of us to find ways to create environments that tell predators that we do not agree with their behaviors and to tell survivors that we will support them. Your actions matter; do not be a bystander. Be an agent of change. For additional information visit the Title IX webpage at www.tamuct.edu/departments/compliance/titleix.php.
11. **Behavioral Intervention:**
TAMUCT cares about the safety, health, and well-being of its students, faculty, staff, and community. If you are aware of individuals for whom you have a concern, those who are exhibiting concerning behaviors, or individuals causing a significant disruption to our community, please make a referral to the Behavioral Intervention Team. Referring your concern shows you care. Complete the referral online (cm.maxient.com/reportingform.php?TAMUCentralTexas&layout_id=2). Anonymous referrals are accepted. Please see the BIT website (tamuct.edu/student-affairs/bit.html). If a person’s behavior poses an imminent threat to you or another, contact 911 or TAMUCT police at 254-501-5800.

12. **Copyright Notice**
   Students should assume that all course material is copyrighted by the respective author(s). Reproduction of course material is prohibited without consent by the author and/or course instructor. Violation of copyright is against the law and against TAMUCT’s Code of Academic Honesty. All alleged violations will be reported to the Office of Student Conduct.

VIII. **The professor teaching this class**

Dr. Rappaport has a life-long interest in (really, fascination with) issues related to human biological functioning, owing to the fact that her social work career focused on medical social work (working with infants, children, and adolescents who had congenital defects, physical and mental disabilities, chronic illnesses, or life-shortening medical conditions). She actually selected this field of social work practice because she, herself, was born with some congenital defects that required ongoing medical care, major surgeries, and rehabilitation services, and she continues dealing with chronic conditions now. She has also seen the effects of illnesses and disabilities in her family members, including having a mother who died of breast cancer, a grandmother who died of a series of strokes, and a grandfather who became paralyzed by spinal arthritis. Dr. Rappaport provided caregiving to several family members in their last months and years of life. In her 25 years of practice as a social worker before coming to Killeen to teach social work in August 2000, Dr. Rappaport has seen direct evidence of how important it is for all social workers to have at least a basic understanding of biological human functioning and of some of the major medical conditions and disabilities that are commonly experienced by people who turn to social workers for assistance with their ability to continue functioning and maintaining quality of life.

Dr. Rappaport takes teaching very seriously. She wants students to enjoy this class and to feel like they learned a great deal from it. She is committed to coming to class prepared, to sharing her professional knowledge and experiences with students, and to encouraging everyone to participate actively in the discussions. In return, she expects students to come to class prepared, having read the day’s assignment ahead of time and being ready to ask any questions they might have about things they did not understand in the reading. She responds to emails as soon as possible, and she tries to get all written assignments graded and returned to students within the following one to two class periods. Twice during the semester she will also give a grade sheet to each student, showing them where their grade in the class stands as of that point.
# IX. Course Schedule

<table>
<thead>
<tr>
<th>Date</th>
<th>Description</th>
</tr>
</thead>
</table>
| Monday 1/13/20 | **Handout: Why Do Social Workers Need to Study Human Biology?**  
Human Biology  
Alternative Treatments  
Evolution, Natural Selection, Eugenics, Involuntary Sterilization  
Ecology  
Nature vs. Nurture Debate  
Ethical Dilemmas and Biology  
Wellness and Preventive Health Care  
Placebo, Nocebo  
**Handout: Human Biology and Scientific Method**  
Characteristics of Living Things  
Levels of Biological Organization  
Scientific Method  
FDA/Clinical Trials  
Pompe Disease |
| Wednesday 1/15/20 | Impact on Patients and Families of the FDA Processes  
Video: Watch part of “Extraordinary Measures” (1:46)                                      |
| Monday 1/20/20 | **NO CLASS – CELEBRATE THE LIFE OF DR. MARTIN LUTHER KING, JR.**                                                                           |
| Wednesday 1/22/20 | **Text: Falvo, pp. 1-9 (Chapter 1) – Conceptualizing Functioning, Health, and Disability**  
Medical Model  
Social Model  
Biopsychosocial Model  
Experience of Disability  
International Classification of Functioning, Disability, and Health  
Optimum versus Maximum Function, Capacity, and Performance  
**Text: Falvo, pp. 11-32 (Chapter 2) – Psychosocial and Functional Aspects of Health Conditions**  
Experience of Health Conditions and Altered Function  
Disease, Illness, Health Conditions  
Stress & Coping Strategies  
Emotional Reactions  
Developmental Stages  
Self-Concept, Self-Esteem  
Invisible Conditions  
Family Adaptation  
Quality of Life  
Adherence to Management Recommendations  
Health information  
Stages of Adaptation and Adjustment  
Functional Aspects  
Vocational Issues  
**Handout: Perceptions/Coping with Chronic Illness**  
**Handout: The Cell, Organelles, Metabolic & Mitochondrial Diseases**  
Video: “Conjoined at the Head” (0:45) – take the TV to class |

APA CHECKLIST

The following checklist is designed to serve as a guide for you when writing papers in the Social Work Department. Use of this guide will support your success when using APA and help to prevent plagiarism. All instructors in the Social Work Department will use this checklist as a guide when grading your papers for APA policy adherence, so it is advisable that you become familiar with and apply these rules to all papers.

A. Entire document MUST HAVE
   □ Times New Roman Font
   □ 12 font size
   □ 1 inch margins on all four sides
   □ Double spacing after periods at the end of a sentence (except in the “Reference” page)
   □ Double spacing between lines in paragraphs (remove double spacing between paragraphs)
   □ Numbers 1-10 spelled out (e.g. “one”, “five”, “seven”)
   □ Numbers above 10 not written out (except at the beginning of a sentence)
   □ Introduction of acronyms (e.g. “Supplemental Security Income (SSI)”, “SSI” may be used alone thereafter)
   □ Paragraphs versus bullets (unless approved by professor)
   □ No use of “I” (unless approved by professor due to nature of the assignment)
   □ No contractions (won’t, can’t, don’t), lbs, %, $ (percent signs may be used directly after numbers)
   □ Complete sentences
   □ Indented paragraphs (tab once from margin)
   □ Introduction, body and conclusion (unless otherwise noted by professor)
   □ Cover page, abstract page, reference page (unless otherwise advised by professor)

B. Cover Page
   □ Header flushed left and written as “Running head: SHORT TITLE” (note how “Running head:” is written)
   □ Page # (always starts with “1” at the top right)
   □ Title of work, your name, and the name of the university (in this order), centered and not in bold. This should also be double spaced and the title of the work should begin 9 single spaces after the header.
   □ Title should be no more than 12 words, first letters of words are capitalized except “and”, etc.
   □ The “SHORT TITLE” is always in capital letters and is a shortened version of your title. This can be no more than 50 characters

C. Abstract Page
   □ This is page 2 (upper right corner)
   □ In the Header section flushed left will show on this page “SHORT TITLE” only. No “Running head:” used on this or subsequent pages
   □ The word “Abstract” is centered, not bold at the top of the paper
   □ The Abstract is only 4-5 sentences (max 150-250 words)
   □ There is no indentation at the beginning of this paragraph
   □ Must be double spaced

D. START OF YOUR BODY
   □ Continue your “SHORT TITLE” and page number on every page
   □ Write the title at the very top. This should be the same one used on the cover page above your name
   □ The title is centered and not in bold
   □ All paragraphs must be indented
   □ Paragraphs have a minimum of 5 sentences
   □ Using Level Headings where appropriate (refer to your professor on when to use; see APA manual for all levels of headings: 1-5)

47
E. Reference Page

- Header section flushed left should show the “SHORT TITLE” and the page # on the right side.
- The word “Reference” (or “References” if more than one) is centered and not bold.
- The references must be alphabetized (by last name of author of work as listed on the work. DO NOT reorganize the authors in alphabetical order from the source).
- If there is more than one citation with the same author and year, put them in alphabetical order by title and make them 2015a, 2015b, 2015c, etc., as needed.
- Double space references
- Remove space between references
- Only single spacing after punctuation
- Remember that personal communication in-text citations are not listed on the reference page
- Remove hyperlinks from websites (a line should not appear under websites in your reference page)
- If the reference is long and continues on the next line, then you must indent the second line (this is called a “hanging indent”)
- All references MUST have an in-text citation to match (except in personal communication; only in-text citations are used).
- If the reference has an edition, it goes in parentheses and is not italicized. For example, Turner, F. J. (2011). *Social work treatment: Interlocking theoretical approaches* (5th ed). New York: Oxford University Press.

Following are explicit examples that can serve as guides for you when writing your papers.

- Boston University School of Social Work:

- Sample APA Paper Owl Purdue:
  [http://owl.english.purdue.edu/media/pdf/20090212013008_560.pdf](http://owl.english.purdue.edu/media/pdf/20090212013008_560.pdf)

- Son of Citation Machine Citing Support:

**EXAMPLES OF APA ERRORS**

- **Missing comma after name and before year**
  - Incorrect: (Dobson & Pewter 2013)
  - Correct: (Dobson & Pewter, 2013)

- **Missing parenthesis**
  - Incorrect: Many children in America are diagnosed with ADHD Dobson & Pewter, 2013.
  - Correct: Many children in America are diagnosed with ADHD (Dobson & Pewter, 2013).

- **Using and instead of & in a citation**
  - Incorrect (Dobson and Pewter, 2013)
  - Correct: (Dobson & Pewter, 2013)

- **Using “pp.” instead of “p.” to denote page.**
  - Incorrect: “Many children in America are diagnosed with ADHD” (Dobson & Pewter, 2013, pp. 5).
  - Correct: “Many children in America are diagnosed with ADHD” (Dobson & Pewter, 2013, p. 5).

- **Missing punctuation at the end of sentences when citing.**
  - Incorrect: Many children in America are diagnosed with ADHD. (Dobson & Pewter, 2013)
Correct Citation Example:

In-Text: (Dobson & Pewter, 2013)

- Using quotation marks without page number/paragraph information.
  - Incorrect: “Many children in America are diagnosed with ADHD” (Dobson & Pewter, 2013).
  - Correct: “Many children in America are diagnosed with ADHD” (Dobson & Pewter, 2013, p. 5).

- Example of how to cite a class handout: (Be sure to use the hanging indent on your paper)

- Example of how to cite a movie: (Be sure to use the hanging indent on your paper)

To obtain information for a movie citation, look up the movie on the internet and select the IMDb listing. First look up (under Full Cast and Crew) all the producers (listed after all the cast), ignoring those listed as executive producer, co-producer (unless ALL the producers are listed as co-producers), assistant producer, line producer, etc. Then to back to the top before the cast members and add the director(s) and writer(s). Go to Company Credits to list the production companies (ignore the list of distributors, but be sure to list all of the production companies).

__________

Checklist to avoid some common errors using APA in papers

Dr. Claudia Rappaport

_____ The title on the front page is repeated on the first page of the text of the paper, and both titles are exactly the same wording.

_____ The words “Running head” ONLY appear in the running head on the front page; the name of the running head is always in all capital letters.

_____ Entire paper, including running head, has to be in Times New Roman 12 font. You can’t change font in title, on the front page, etc. to be decorative

_____ The front page can ONLY contain the running head, the page number, the title of the paper, your name, and the name of the university. Nothing else!!

_____ Every paragraph has at least five sentences.

_____ No contractions (isn’t) are used anywhere in the paper unless quoting someone.

_____ There is no extra line space between paragraphs (to achieve this, go to page layout, then go to spacing and make sure that the spacing is set to 0”).

_____ All paraphrasing from another source has an in-text citation, and the format would be like this: (Rappaport, 2018). If exact words are used from the source, then you also use quote marks and the page number is included in the in-text citation (the format would be: Rappaport, 2018, p. 2). If you are using more than one Rappaport handout
for citations, you will have to use Rappaport 2018a, Rappaport 2018b, etc., and the letters will be assigned based on the titles of the handouts being in alphabetical order on your reference page. When writing a paper about an interview of a person, you use personal communication citations within the text of the paper. After every paragraph in which you summarize information given in the interview, your in-text citation will appear like this: (C. Rappaport, personal communication, August 28, 2017). THERE IS NO REFERENCE PAGE ENTRY FOR PERSONAL COMMUNICATION CITATIONS.

USES OF COMMAS AND OTHER COMMON PUNCTUATION/GRAMMAR ERRORS

The following are some common uses of commas:

Putting two sentences together, joined by and, but, or another linking word. Both parts have to have both a subject and a verb, or you don’t need a comma.

- Example: Martha went to the Laundromat, and she discovered that she forgot her money at home.
- Does NOT need a comma: Martha went to the Laundromat and discovered that she forgot her money at home.
- Note: Two sentences can also be joined together by a semicolon without a connecting word.
- Example: Martha went to the Laundromat; she discovered that she forgot her money at home.
- Example: I thought this was going to be complicated, but I was surprised; they listened and paid attention.
- Note: Two sentences can also be joined together by a semicolon and a connecting word such as however, followed by a comma.
- Example: Martha went to the Laundromat; however, she discovered that she forgot her money at home and had to make a return trip.

Writing a list of objects, when no item of the list requires a comma within the item. If one item requires a comma, then the items have to be separated with semicolons instead of commas.

- Example: Martha went to the store and bought apples, plums, oranges, and nectarines to make a fruit salad.
- Need to use semicolons instead: Martha went to the store and bought golden, delicious apples; purple, juicy plums; plump, navel oranges; and nectarines to make a fruit salad.

Note: The above example with semicolons also illustrates another use of commas: When you are using more than one adjective to describe a noun (such as golden, delicious apples), the two adjectives need to be separated with a comma.

Separating the name of a city and the state in which it is located.

- Example: I was born in San Antonio, Texas, in the year 1950.

Separating a person’s name and their relationship to another person, the name of a book and its author, etc.

- Example: Her father, Burton Rappaport, was born in New York City in 1921.
- Example: Burton Rappaport, the father of Claudia Rappaport, was born in New York City in 1921.
- Example: Harper Lee’s novel, To Kill a Mockingbird, is required reading in many schools.

Separating a prepositional phrase at the beginning of a sentence from the remainder of the sentence.

- Example: In case of a fire, you need to move quickly to the nearest exit.
  - Note another grammar rule: Do not put the adverb in between to and move (i.e., do not say “you need to quickly move to the nearest exit”). Doing this is referred to as a split infinitive. Just remember Shakespeare: It is “To be or not to be,” not “To be or to not be.”
- Example: From one social worker to another, you need to be on the lookout for signs of social work burnout.
• Example: During the depression of the 1930’s, food was scarce and unemployment rates were high.
  
  o Question: Why do you not need a comma after scarce?

• Example: If you are not ready to calm down, I want you to go to your bedroom and think about why your behavior has not been appropriate.

• Example: Because she got paid a lot less this week, she was not able to give the landlord her rent.

  Note: If the prepositional phrase is in the middle of the sentence, it does not require commas.
  
  o Example: The hot air in the classroom made it very difficult to study.
  
  o Example: She couldn’t give the landlord her rent because she got paid a lot less this week.

After using a single word to catch your attention at the beginning of a sentence; most commonly this will be done in conversation, not in formal writing.

• Example: “Well,” she said, “I guess I need to go ahead and start fixing dinner.”
  
  o Note another rule of grammar: Punctuation marks (commas, periods, exclamation points, question marks) always go INSIDE the quotation marks.

• Example: Gosh, it is really hot today.

• Example: Hello, my name is Dr. Rappaport.

• Example: No, you can’t have a cookie right now.

• Example: Yes, I heard what you said.

• Example: Unfortunately, one of the social work professors has decided to leave Tarleton.

• Example: However, you need to remember that I expect you to study hard for my tests.

• Example: John, did you have a question you wanted to ask?

To add additional details to clarify a sentence; if you removed those additional details, you would still have a complete sentence.

• Example: When I started college, something I had always dreamed of doing, I decided to major in social work.

• You could remove the phrase in the middle and still have a complete sentence: When I started college, I decided to major in social work. Why do you still need a comma there?

When getting ready to quote a sentence – but only if you are really quoting the person’s exact words, not paraphrasing.

• Example: I wasn’t saying, “How could you?” Rather, I wanted to know, “What were you thinking when you did that?”

• Example: Dr. Rappaport always said, “Be careful of using Spell Check as your only type of proof-reading on papers.”

• Example of NOT using quotation marks: Dr. Rappaport always told us to be careful of using Spell Check as our only type of proof-reading on papers.

Before adding a phrase starting with which or whose to add more details to the sentence.

• Example: A major strength of the agency is the fact that each social worker uses a different approach, which allows them to complement each other’s skills.

• Example: He is a millionaire now, which only goes to show how much a person can accomplish if he really sets his mind to it.

• Example: The crowd, whose patience had worn thin, was threatening to tear down the sign and instigate a riot.

• Example: The building, whose architect had won a national award, was one of the most popular tourist attractions in the city.

To separate out parenthetical words from the rest of the sentence.

• Example: Expensive items, however, will not be included in the auction.
• Example: Expensive items, of course, will not be included in the auction.
• Example: Expensive items, unfortunately, will not be included in the auction.
• Example: Expensive items, therefore, will not be included in the auction.

**Before a word like also or too or as well at the end of a sentence.**
• Example: We should plan to have another fundraiser before the end of the month, also.
• Example: He’s quite good looking, too.

**Do not use a comma if the additional words identify the subject word and are not additional information.**
• The company rewards employees who work hard. (Do not put a comma if what you mean is that the company ONLY rewards employees who work hard. If ALL employees work hard and get rewarded, then put a comma: The company rewards its employees, who all work hard.)

**You usually do NOT use a comma before “because.”**
• Example: She was deeply ashamed because she was the only woman who failed the exam.

**You often do not need to use a comma after an introductory phrase that designates when something occurred.**
• Example: In about five minutes we are leaving for school.
• Example: In 2000 Dr. Rappaport came to teach at TAMUCT.

**OTHER COMMON WRITING ERRORS**

**Capitalizing words that do not need capitals**
• Capital letters are used for proper nouns, people’s names, names of cities and states, etc. They are often used when they are not needed. For example:
  o I am a student in the Social Work Department at Tarleton State University-Central Texas. It is correct to capitalize social work here because it is in the name of a Department.
  o I want to be a social worker. You do not capitalize it here because it is not a proper noun.
  o My biggest supporter is Mother. You need to capitalize mother here because you are using it as a person’s name.
  o I live with my mother and my father. You do not capitalize them here because you are not using them as names.
  o I graduated from Alamo Heights High School. You capitalize high school here because it is the name of a specific high school.
  o I graduated from high school. You do not capitalize it here because it is not a proper noun. **Also note that you need the word “from”. I graduated high school is slang without the word from.**

**Confusing different forms of words that sound the same.**
• Where: I asked him where he was born.
• Were: There were 25 questions on the test.
• Wear: I asked him what he was going to wear to the interview.

• Their: These parents really love their children.
• There: There are too many students in this class.
• They’re: This is the contraction for “they are.” **Note: You usually do not use contractions in formal written work.**

**Two different forms for possessives:**
• This is my parent’s house. Use the apostrophe before the s only if it is ONE parent’s house. Both parents do not live in the house, or you only have one parent.
• This is my parents’ house. Use the apostrophe after the s if it is BOTH parents’ house. Both parents live in the house.
Parents are very important people. You do not use any apostrophe because you are simply making a noun plural. Never use an apostrophe unless you are making a noun a possessive word (meaning it belongs to someone).
