Course Description and Objectives

Social media is changing how business is done around the world in almost every industry. The marketing and business worlds are undergoing fundamental changes in how consumers interact with brands and each other. Social media has helped give consumers a voice and connect them with their friends and other like-minded consumers, and it has also opened up numerous new communication channels available for marketers and brands to connect with current and potential customers.

This course is designed to help you understand how marketing has (and has not) changed due to the rise of social media and changes in various underlying contextual factors, such as dramatically increased speed of information dissemination across consumers and brands. The overarching goal is to obtain a clear perspective on what's really going on in digital/social/mobile marketing so that you can begin to appreciate its true value to consumers, to managers, and to other corporate stakeholders. It will equip you with the relevant knowledge, perspectives, and practical skills required to develop marketing strategies that leverage the opportunities inherent in social media and consumer-to-consumer social interactions for achieving business and marketing goals.

Note that this course is NOT about specific online social media platforms that you may know well from a user perspective (e.g., Facebook, Twitter, Instagram, Snapchat). While these platforms are important and will of course be discussed, it is important to know in advance that this course is not solely about these platforms. The intention is to broaden your perspective, not narrow your thinking by focusing on just a few platforms that happen to be important now.

The emphasis of this course is instead on understanding consumers' social interactions, examining the various social media channels available to marketers, learning how to build social marketing strategies, and practicing how to track their effectiveness. Also, since social media is heavily technology-driven, we will cover some relevant related aspects in digital marketing more broadly, including emerging topics in electronic commerce and mobile marketing.

Learning Outcomes

This course will offer you an opportunity to:

- Understand what social media is and how this new type of media and communications technology influences how business and marketing is done
- Understand key principles of “connected consumers” from psychological and sociological perspectives, and how these principles can be leveraged when developing social media marketing strategies
- Develop skill in using the predominant social media tools currently available for business/marketing communication
- Discover innovative uses for social media in a variety of business areas and processes (e.g., new product development and service management)
- Understand how to use various social media channels to publish and disseminate relevant branded content in order to engage consumers and to increase social impact, influence, and value
- Develop a strategic plan for identifying opportunities for using social media in a company

Course materials

Instructions for obtaining digital copies of case studies, “Mimic Social Simulation,” and “Social Media Marketing: Principles and Strategies” textbook will be distributed individually via email from no-reply@stukent.com or from my professor email. Watch for the email, and check your spam folder in case it somehow goes there.

A very important part of this course is the simulation. This simulation will give you a taste of what it is like to run a social media marketing campaign for a business. There are six rounds to the simulation. It is likely that you will not do very well for the first round or two, but that is all right. Don't worry. This, combined with the lesson materials, will help prepare you for success in social media marketing.

COVID-19 SAFETY MEASURES

To promote public safety and protect students, faculty, and staff during the coronavirus pandemic, Texas A&M University-Central Texas has adopted policies and practices to minimize virus transmission. All members of the university community are expected to adhere to these measures to ensure their own safety and the safety of others. Students must observe the following practices while participating in face-to-face courses, course-related activities (office hours, help sessions, transitioning to and between classes, study spaces, academic services, etc.) and co-curricular programs:

- Self-monitoring—Students should follow CDC recommendations for self-monitoring. Students who have a fever or exhibit symptoms of COVID-19 should participate in class remotely and should not participate in face-to-face instruction. Students required to quarantine must participate in courses and course-related activities remotely and must not attend face-to-face course activities. Students should notify their instructors of the quarantine requirement. Students under quarantine are expected to participate in courses and complete graded work unless they have symptoms that are too severe to participate in course activities.
- Face Coverings— Face coverings must be worn inside of buildings and within 50 feet of building entrances on the A&M-Central Texas Campus. This includes lobbies, restrooms, hallways, elevators, classrooms, laboratories, conference rooms, break rooms, non-private office spaces, and other shared spaces. Face coverings are also required in outdoor spaces where physical distancing is not maintained. The university will evaluate exceptions to this requirement on a case by case basis. Students can request an exception through the Office of Access and Inclusion in Student Affairs.
 - o If a student refuses to wear a face covering, the instructor should ask the student to leave and join the class remotely. If the student does not leave the class, the faculty member should report that student to the Office of Student Conduct. Additionally, the faculty member may choose to teach that day's class remotely for all students.

- Physical Distancing—Physical distancing must be maintained between students, instructors, and others in the course and course-related activities.
- Classroom Ingress/Egress—Students must follow marked pathways for entering and exiting classrooms and other teaching spaces. Leave classrooms promptly after course activities have concluded. Do not congregate in hallways and maintain 6-foot physical distancing when waiting to enter classrooms and other instructional spaces.
- The university will notify students in the event that the COVID-19 situation necessitates changes to the course schedule or modality.

OPTIONAL POLICY STATEMENTS

A Note about Sexual Violence at A&M-Central Texas

Sexual violence is a serious safety, social justice, and public health issue. The university offers support for anyone struggling with these issues. University faculty are mandated reporters, so if someone discloses that they were sexually assaulted (or a victim of Domestic/Dating Violence or Stalking) while a student at TAMUCT, faculty members are required to inform the Title IX Office. If you want to discuss any of these issues confidentially, you can do so through Student Counseling (254-501-5955) located on the second floor of Warrior Hall (207L).

Sexual violence can occur on our campus because predators often feel emboldened, and victims often feel silenced or shamed. It is incumbent on ALL of us to find ways to actively create environments that tell predators we don't agree with their behaviors and tell survivors we will support them. Your actions matter. Don't be a bystander; be an agent of change. For additional information on campus policy and resources visit the [Title IX webpage](https://www.tamuct.edu/compliance/titleix.html) [https://www.tamuct.edu/compliance/titleix.html].

You can complete the [referral](https://cm.maxient.com/reportingform.php?TAMUCentralTexas&layout_id=2) online [https://cm.maxient.com/reportingform.php?TAMUCentralTexas&layout_id=2].
