Required Texts

The student study website for your textbook (Schutt 2021) can be found at https://edge.sagepub.com/schuttsw2e. Here you will find helpful tools to increase your knowledge of research methods, concepts etc. I would highly suggest that you use the website.

Course Description
Principles and methods of social research, including research design, methods of observation, questionnaires, interviews and other sources of social data; qualitative and quantitative techniques of inference; analysis and research report writing.

Course Objectives
Knowledge Outcomes:
1. Students will know the nature of scientific inquiry.
2. Students will understand the process of forming research questions.
3. Students will know the techniques of conducting sociological research and critiques of these techniques.
4. Students will understand issues of measurement and sampling.
5. Students will understand the ethical considerations of research.
6. Students will learn and practice writing within the discipline of sociology.
Skills Outcomes:
1. **Critical thinking**: Students must have “sociological insight” in order to see through official explanations of social life, common sense conclusions, and conclusions based solely on personal experience. Using the tools of the discipline, sociologists analyze social life that entails using their sociological imaginations.

2. **Abstract thinking**: Sociology is a discipline of theory testing. Research techniques and statistics help us describe social phenomena and allow us to evaluate theoretical statements.

3. **Persistence**: Just because we live in a society does not mean we automatically know everything about it. Hard study is required, and thinking is mandatory! Research methods help us see through the veneer of official accounting of the world around us. Research is about persistent curiosity.

4. **Flexibility**: Students will learn the discovery of hidden social processes. It is imperative that we become flexible in our thinking and willing to process what we already know. Students should be active agents in their own learning.

5. **Expansion of knowledge**: This course aims to expand students’ breadth of knowledge of social behavior, organization, and diversity within populations. Research techniques help us see how social processes affect individual development and life chances.

6. **Discipline style writing**: The student will learn how to link the thinking and writing dimensions of the research process within the discipline of sociology. This skill outcome will be accomplished by completing a final research proposal paper (with three drafts), and critique scholarly research articles.

**Writing Instructive (WI) Course:**
This is a Writing Instructive (WI) course so writing will be an integral part of my instruction and our interactions. Writing will also be a fundamental way that I measure student mastery of course content. WI means that you will have several opportunities to work on improving your writing skills.

1. **Assignment Revisions**: For this course, you will be completing a Final Research Paper Proposal. You will have three drafts which will help you to develop your final paper. Once you turn in your drafts, if I believe that you need to revise that assignment, I will ask that you do so. It is very important that you complete and submit revisions as specified so that you will have a complete final research proposal.

2. **Posting of Grades**: Normally, I grade on most weekends. My goal is to grade your assignments the same week that they are turned in, if possible. If I am running behind, I will send out an email letting students know the status of their assignments. Because I expect all students to improve on each writing assignment as they progress through the semester, I strive to get your grades with comments to you as soon as I can.

3. **Grade Turnaround**: In this course, you can expect that I will provide feedback on all assignments in one week or less.
Taking a Sociological Perspective: I encourage questions and discussion concerning course material and sharing personal observations and experiences. However, since you are enrolled in a sociology course, the main goal is to utilize a sociological perspective. This means that you should try to analyze various topics with an objective point of view. Objective point of view means looking through the lens of sociology. How does sociology utilize objectivity, you might be asking? Sociology is a social science – qualitative and quantitative research techniques are used to collect data about the social world. Sociologists must always strive to maintain an objective outlook when observing the social world. Therefore, in this course, you will be challenged to look within the layers of a social phenomenon or put another way, to look beyond what you see on the surface. In addition, you will not agree with everything you hear in class from the professor or your classmates. Part of becoming educated requires that your ideas are challenged. As a college-level student, you should be able to see different points of view of the same issue. I expect students to be respectful towards every person in this classroom, even if they disagree with certain viewpoints.

The role of the instructor is to present critical ideas, to offer an analytical framework for understanding the course material, to work with students in providing an inspiring learning environment, and to provide and receive constructive feedback. It is not the instructor’s role to tell the student what to think. The student’s responsibility is to read the readings with a critical mind, to question, to complete assignments on time, to participate in the exchange of ideas, and to work toward an inspiring learning environment. It is the responsibility of all of us to create a safe learning environment free of racism, sexism, classism, ageism, ableism, homophobia, transphobia and heterosexism.

Late Work: When you are turning in assignments, your work must be uploaded in Canvas at the specified due date and time. I will not accept that assignment through email. However, if you are having an issue with an assignment, let me know ahead of time and I will do what I can to accommodate you.

Additional Help: If you need additional help on assignments, papers, or any materials covered in class, please do not hesitate to contact me. The best way to get in touch with me is through email.

Incomplete Grades: I DO NOT GIVE OUT INCOMPLETE GRADES. ALL ASSIGNMENTS AND TESTS ARE DUE ON THE DATES OUTLINED IN THE SYLLABUS.

Attendance and Participation
Attendance and participation are very important. One of the goals for this class will be to stimulate creative and critical thinking which requires being involved in the analysis and discussion of various topics. Participation means being prepared by doing the readings before class and offering substantive insights and comments during class discussions. I will hand out an attendance sheet before each class. Please make sure that you sign in because you will not be allowed to sign in after the fact. You will earn points for attendance so please see specific details under the Course Requirements section of this syllabus.
Other Relevant Issues

- If you have to leave early, please let me know before class begins.
- Please do not come to class late. Not only does this cause disruption but coming in late is disrespectful to the professor and your classmates.
- If you do not sign in for a particular day, I will not allow you to come back later to sign the attendance sheet. It is your responsibility to sign in when you attend class.
- **Please put your phones away during class.** No texting or playing on social media while class is in session. Please do not listen to music while sitting in my class. I will ask you to leave the class and you will not earn attendance credit.

Course Requirements

1. **Research Design Drafts for Final Proposal Paper (200 total points):** You will complete three drafts (assignments). These drafts are designed to help in the development of your final proposal paper. Also, take a look at https://www.ncbi.nlm.nih.gov/pmc/articles/PMC5037942/ or the pdf. file located under the Research Proposal Paper assignment tab in Canvas. This is an excellent resource, providing what your actual research proposal paper should contain.

**Instructions:** There are three parts to this assignment with each having a different due date. The goal is to complete each draft which will culminate into your Final Research Proposal Paper. The more work you put into these assignments, the less you should have to complete at the end of the semester when writing the final paper proposal. But the main goal is to construct an outline for
what will become your final project. For the questions posed below, do not simply provide a one sentence answer. Provide dialog to support your answers. The grading rubrics for each draft are also located at the end of your syllabus. In addition to your textbook (Schutt 2021), you will also find helpful Writing in Sociology: A Brief Guide by Smith-Lovin and Moskovitz (2017). This short guidebook will help in the writing of your design drafts as well as your final proposal paper.

**Part 1: Research Question Development (50 total points) – Due Saturday September 24 by midnight**

1. State the topic in which you want to write your research proposal. Provide detailed information about your topic, enough that the reader understands the social problem. Remember that the topic must be **narrow** in scope. (10pts)

2. What is your research question? Is it exploratory, explanatory, or descriptive in nature? (You will find this information in Chapters 1 and 2 of your textbook) (10pts)

3. What theoretical perspective drives your research question and your research? (i.e. inductive or deductive found in Chapter 2) (10pts)

4. Why are you investigating this topic? Why is this social problem important to investigate? (10pts)

5. You will earn points for spelling, grammar and sentence structure. (10pts)

**Part 2: Review of the Literature – Annotated Bibliography (110 total points) – Due Saturday October 15 by midnight**

1. To begin your exploration of the topic, provide an annotated bibliography of 10 scholarly research articles on your topic. An annotated bibliography is basically a summary of each article. You want to summarize the important details about the research. You should write up to **125 words** (double-spaced) for each article summary. **You are NOT cut/pasting directly from the article.** Your summary should contain important details about the research that you find essential. Also take a look at [https://libguides.usc.edu/writingguide/researchproposal](https://libguides.usc.edu/writingguide/researchproposal). This website is an excellent resource, providing what a research proposal paper should contain, including the literature review.

2. Each article is worth 10 points for a total of 100 possible points. You will also be graded on spelling, grammar and sentence structure. (10pts).

3. List each citation in ASA. Right below your citation, you can provide your 125 word summary. **If you do not list the citation in ASA, up to 3 possible points will be deducted for each entry.**

4. You will use the annotated bibliography to **construct** your literature review in the final research proposal due at the end of the semester. **This means that you will not cut/paste the**
annotated bibliography into the final paper. If you do, you will not earn points in your final paper proposal for your literature review section. You will write a cohesive literature review for the final paper. Let me know if you have any questions.

Part 3: Research Design (40 total points) – Due Saturday November 5 by midnight

1. Choose your research design. Depending on what method you choose, you will need to discuss how you will collect your data, state hypotheses, define concepts, variables etc. (10pts)

2. How you will you collect your sample? This will depend on the methods that you choose (i.e. Qualitative vs. Quantitative) Please be specific about your sampling method. (10pts)

3. What might be some of the limitations of your proposed study? (10pts)

4. You will earn points for spelling, grammar and sentence structure (10pts)

2. Final Research Proposal Paper (200 points) – Due Monday December 5 at 11:59pm:
Your final paper will include the sections that are contained in a research proposal paper (except for the results since you will not actually conduct the research). Your assignments/drafts leading up to the final paper should be utilized for the final project. **Keep in mind that you are not doing the actual research.**

The Format and Organization of Paper

- Font: Times New Roman 12
- Margins: 1” (inch) top and bottom, 1 (inch) left and right
- Pages should be numbered (page # centered at the bottom of the page)
- Your literature review should include no less than 10 scholarly research articles.
- Please double space your paper.
- 10 - 15 pages of written text (3750 words is the maximum). All items in the appendices are not included in the page totals.
- You should use American Sociological Association (ASA) Reference style.

Please organize your final paper by using the following sections. The website [https://www.ncbi.nlm.nih.gov/pmc/articles/PMC5037942/](https://www.ncbi.nlm.nih.gov/pmc/articles/PMC5037942) OR the .pdf located under the research proposal submission tab in Canvas, should be used to help you understand what sections need to be included in your proposal. Below are the sections that you will want to include in your final research proposal paper:

1. **Abstract** – 200 words
2. **Introduction, Background and Significance**
3. **Review of the literature**
   - Your annotated bibliography is NOT your review of the literature. You want to write a literature review as you would for any social science research paper. Your annotated bibliography is used to help construct your final literature review
section of this final paper proposal, but that is all. If you have questions, please let me know.

4. Aims and Objectives
5. Research Design and Methods
   o In this section, you want to tell the reader what kinds of methods you would use if you were going to conduct your research project. You might include some of the following (depending on your chosen methodology):
     - Measurement of concepts and variables
     - Data Collection Method/Analysis
     - Selection of Subjects – Sample

6. Final Conclusions/thoughts - The conclusion should highlight why the student’s research is needed, ethical issues, budget considerations, limitations, and the implications that can be anticipated from your study

7. Appendices (if applicable)
8. References (in ASA format)

3. Research Article Critique Papers (4 papers x 45pts/each = 180 total points): For your Research Article Critique Papers, I will provide you with an article to critique. In your tentative course syllabus, you will find the due dates for these papers. I will specify which article to critique for that week. The link to each article is located in Canvas under each assignment tab.

Just a word of warning, I do not want you all to copy/paste your information directly from the articles to fill in the information. Please provide your own analysis. If you do need to directly quote, use proper referencing. If all of your information is copy/pasted into your final assignment, this will be considered an act of plagiarism.

Directions:
- For your Research Article Critique Papers, I will provide you with an article to critique. In your tentative course syllabus, you will find the due dates for these papers. I will specify which article to critique for that week. Your articles are located under each assignment link in Canvas.
- Read the article and fill out the following information below, providing some detail regarding each section. My goal is to provide you with an article that is relevant to the course information you are learning about for that week OR material we have already covered. However, keep in mind that you may not understand everything that you read but the goal is to study each article and do your best to determine the correct answers.
- On page 301 (Appendix A) of your textbook, you can review “Questions to Ask about a Research Article.” On page 303 (Appendix B) of your textbook, you will also find an outline detailing “How to Read a Research Article.”
- Please make sure that you practice good spelling, grammar and sentence structure. This is a senior level class and you will earn points for your writing skills.
- You will find your grading rubric at the end of your syllabus. Do not leave any of your sections blank. If you are unsure of your answer, provide some dialog. I would prefer that you at least try. Sections of your critique include:
Critique Paper Assignment Outline

1. List citation of the article that you are reading (using American Sociological Association – ASA Reference style). Page 57 of your ASA guide goes over how to list a journal article.
2. Theoretical orientation (Chapter 2 covers inductive, deductive etc).
3. Measurement (Chapter 4 covers measurement)
4. Sampling (Chapter 5 cover sampling)
5. Research design - Specify type of method (examples below):
   - Experiments
   - Survey Research
   - Field Research
   - Content Analysis
   - Analyzing Existing Statistics
   - Comparative or History Research
   - Evaluation Research
6. Data analysis (How was the data analyzed (SPSS, Statistics, Qual software etc.))
7. Reporting (conclusions)

4. **Attendance (65 points):** Starting the first week of classes, I will take attendance using a sign-in sheet. The class will meet approximately 13 times. You will earn 5 points per day. Therefore, total number of attendance points that you can earn is 13x5=65 points. I consider all absences legitimate so I do not differentiate by labeling some types as excused and others unexcused; all absences are counted the same way. Please note: If you miss a class, you are responsible for getting notes or other materials from other students in the class. **If you come in late to class, you will not be allowed to sign in at the end of class. No exceptions.**

**GRADING RUBRICS FOR COURSE REQUIREMENTS ARE LOCATED AT THE END OF YOUR SYLLABUS.**
