The full set of Standards for the Superintendent Certification (TAC §242.15) may be found on the State Board for Educator Certification (SBEC) website under the adopted rules section for Chapter 242 of the Texas Administrative Code.

This course is designed to address expectations associated with the following Texas standard:

• Texas Standards for the Superintendent Certificate—<u>Learner-Centered Human</u>
<u>Resources Leadership and Management</u> (all skill statements are covered)

The course is also designed to align with the Texas Educator Standards (TExES) Superintendent examination, a test of the content and professional knowledge required of an entry-level superintendent. The test framework is based on the certification standards for superintendents. The content covered by the test is organized intosets of related concepts called domains. The three domains of the test are Domain I—

Leadership of the Educational Community, Domain II—Instructional Leadership, and Domain III—Administrative Leadership. Within each domain, the content is defined by a set of competencies. The ten competencies are organized by domain: Domain I—Competencies 001, 002, 003, and 004; Domain II—Competencies 005, 006, and 007; Domain III—Competencies 008, 009, and 010. Each competency is composed of two major parts: the *competency* statement, which broadly defines what an entry-level superintendent should know and be able to do, and the *descriptive* statements, which describe in greater detail the knowledge and skills eligible for testing. Information about the Domains and competencies for the superintendent examination may be found at:

http://www.texes.ets.org/assets/pdf/testprep\_manuals/064\_superintendent\_55069\_web.pdf

The TEXES competencies for the superintendent examination considered to be related to EDLD 5318 Administrative Law and Personnel Administration are as follows:

- Competency 001: The superintendent knows how to act with integrity, fairness, and in an ethical manner in order to promote the success of all students, including the code of ethics and standard practices for Texas educators, appropriate relationships, boundaries, and communications, and the skills that educators are required to possess and accept with high expectations
- Competency 007: The superintendent knows how to implement a staff evaluation and development system to improve the performance of all staff members and select appropriate models for supervision and staff development.
- Competency 008: The superintendent knows how to apply principles of effective leadership and management in relation to district budgeting, personnel, resource utilization, financial management, and technology use.

#### III. KNOWLEDGE BASE

Students who miss most or all of any class session will be required to complete and submit one or more assignments to make up for the lost learning time. Collaborative participation will be used to assess each student's participation (page 11).

#### VII. EVALUATION AND GRADING:

The instructor will determine grades for the course assignments and assessments through the use of assignment criteria and assessment rubrics outlined in the syllabus. Instructor, self, and peer evaluation will be utilized as means of assessing growth and learning. Assignments turned in from 1-6 days after the posted due date are subject to a maximum of 10% per day reduction of points based on the date received by the instructor. Assignments that are more than one week late will not be accepted. In no case should materials be those submitted for another course; neither should the materials submitted from a collection of file materials. You must complete and submit all assignments to be eligible for an A in the course. A course grade of Incomplete (K) will not be given except in extremely unusual cases. [Note: Points designed in the parentheses () following items are the maximum number of points to be earned.] \*\*\*\*

# GRADING CRITERIA AND RUBRICS

## EVALUATION OF STUDENT PAPERS. PROJECTS, AND PARTICIPATION

The focus of the evaluation process is on improving professional performance. Just as there is no silver bullet, secret formula, or set of foolproof steps for ensuring success as a school administrator, there is no magic formula for assigning grades in a graduate class focused on professional preparation. The value of the learning that occurs as a result of being in a class is the ultimate measure of success—not the grade that is assigned. Graduate students are generally evaluated on their overall performance in a course, not on a single criterion or performance. To facilitate the assigning of grades, a standard set of criteria and grading rubrics will be used in evaluating student performance. Use of the criteria and rubrics is at the discretion of the instructor. In all cases, the awarding of grades is not automatic. The judgment of the instructor will determine whether or not each assignment is satisfactorily completed. Accuracy and care in preparing materials are essential.

The grading criteria and rubrics on the following pages will be used in the course. Rubrics are scoring guidelines (criteria) for evaluating work (a performance or a product) and for giving feedback. Students should check their work against the criteria to ensure they are providing evidence of quality work. It is important to let your audience know the purpose of your work, what you have learned, and the level of mastery you have obtained. If you don't show it or share it—it will not be known. Throughout the course, students will be asked to evaluate their work through reflection. Students will also be asked to evaluate the work of their class members through peer evaluation. Evaluation is used to support learning, not to discredit or embarrass.

### Class Participation

Attendance at all class meetings is expected. When absence is unavoidable, students are expected to contact the professor before the beginning of the class session. Students are expected to come to class prepared for previously-assigned activities and to contribute to the richness of the in-class discussion.

# Written Papers

Written papers are evaluated on both content and style. Your writing demonstrates how you think and reason. It reflects your ability to communicate what you know or have discovered in a clear and organized manner. The official style guide for written papers is APA.

#### Presentations

Presentations are evaluated on both the content and the style of presentation. Students are expected to apply sound principles of oral communication, nonverbal communication, and adult learning when making presentations. The use of technology and effective graphics should enhance, not replace, the content of the presentation.

#### Teamwork

One of the goals of the program is to enhance your ability to work in teams and in team settings. The problem-based learning projects and/or action learning projects undertaken in the program willreinforce learning in team settings. Performance in various team roles (member, leader, facilitator, and recorder) will be evaluated in team settings.

CAVEAT: The awarding of grades is not automatic. The judgment of the instructor will determine whether or not each assignment is completed satisfactorily. Neatness and care in preparing materials are essential. In no case should materials be those submitted for another course; neither should the materials submitted be a collection of file materials. A grade of Incomplete (I) will be given only in very unusual cases.

# CRITERIA AND RUBRIC FOR ASSESSING PROFESSIONAL PORTFOLIO

ASSESSMENT AREA	EXCEPTIONAL	ACCEPTABLE	UNACCEPTABLE
CONCEPTUALIZ ATION	Selection of entries is carefully made to demonstrate in-depth comprehension of preparation goals and Texas Principal standards and dispositions, as well as a high degree of insight regarding their interdependence with professional practice.	Selection of entries demonstrates knowledge of preparation goals and Texas Principal standards and dispositions, and an adequate understanding of their interdependence with professional practice.	Selection of entries reflects insufficient evidence of knowledge of preparation goals and/or Texas Principal standards and dispositions, and/or an inadequate understanding of their interdependence with professional practice.
COHERENCE	Portfolio is enhanced by adherence to thematic framework grounded in student's leadership philosophy and reinforced by selection of entries. Theme provides a unique perspective that allows for creative development of ideas.	Student's leadership philosophy provides thematic unity for portfolio, allowing for logical development of ideas.	No visible thematic framework exists to explain relationships between and among entries. Development of ideas is vague and student's leadership philosophy is unclear.
PERSONAL/ PROFESSIONAL GROWTH	Portfolio demonstrates sustained reflection and critical thought. Assimilation of knowledge, both propositional and procedural, is central to the presentation, providing evidence of reflection and development of knowledge/skill/values. Presentation demonstrates ability to engage in reflection-on-action as well as reflection-in-action. Strong evidence of self-guided self-assessment of learning and growth.	Portfolio demonstrates evidence of reflection and critical thought. A degree of insightfulness is apparent in the student's work, and elements of reflection and development of knowledge/skill/values are recognizable. Presentation addresses process of portfolio development and rationale for selection of entries. Evidence of self-assessment of learning and growth.	Portfolio demonstrates little evidence of reflection or critical thought. Presentation addresses neither the processes of portfolio development nor reasons for inclusion of selected entries. Little evidence of reflection or development of knowledge/skill/values. Little or very limited assessment of own learning and growth.
PRESENTATION	Ideas expressed cogently and with attention to detail. Portfolio and presentation are enhanced by creative application of range of media options, and there are no mechanical errors to detract from the presentation.	Ideas are expressed in a clear fashion. Connections between and among portfolio entries are made clear through logical use of media options and there are few mechanical errors.	Presentation does not conform to expectations for graduate work. Media options are confusing or absent, resulting in a portfolio of discrete entries. Ideas are poorly articulated and multiple mechanical errors detract from the presentation.

Note: Rubric adapted from portfolio rubric used in Marshall University Leadership Studies Program
