Required Texts

The student study website for your textbook (Schutt 2021) can be found at https://edge.sagepub.com/schuttusw2e. Here you will find helpful tools to increase your knowledge of research methods, concepts etc. I would highly suggest that you use the website.

Course Description
Principles and methods of social research, including research design, methods of observation, questionnaires, interviews and other sources of social data; qualitative and quantitative techniques of inference; analysis and research report writing.

Course Objectives
Knowledge Outcomes:
1. Students will know the nature of scientific inquiry.
2. Students will understand the process of forming research questions.
3. Students will know the techniques of conducting sociological research and critiques of these techniques.
4. Students will understand issues of measurement and sampling.
5. Students will understand the ethical considerations of research.
6. Students will learn and practice writing within the discipline of sociology.
Skills Outcomes:
1. Critical thinking: Students must have “sociological insight” in order to see through official explanations of social life, common sense conclusions, and conclusions based solely on personal experience. Using the tools of the discipline, sociologists analyze social life that entails using their sociological imaginations.

2. Abstract thinking: Sociology is a discipline of theory testing. Research techniques and statistics help us describe social phenomena and allow us to evaluate theoretical statements.

3. Persistence: Just because we live in a society does not mean we automatically know everything about it. Hard study is required, and thinking is mandatory! Research methods help us see through the veneer of official accounting of the world around us. Research is about persistent curiosity.

4. Flexibility: Students will learn the discovery of hidden social processes. It is imperative that we become flexible in our thinking and willing to process what we already know. Students should be active agents in their own learning.

5. Expansion of knowledge: This course aims to expand students’ breadth of knowledge of social behavior, organization, and diversity within populations. Research techniques help us see how social processes affect individual development and life chances.

6. Discipline style writing: The student will learn how to link the thinking and writing dimensions of the research process within the discipline of sociology. This skill outcome will be accomplished by completing a final research proposal paper (with three drafts), and critique scholarly research articles.

Writing Instructive (WI) Course:
This is a Writing Instructive (WI) course so writing will be an integral part of my instruction and our interactions. Writing will also be a fundamental way that I measure student mastery of course content. WI means that you will have several opportunities to work on improving your writing skills.

1. Assignment Revisions: For this course, you will be completing a Final Research Paper Proposal. You will have three drafts which will help you to develop your final paper. Once you turn in your drafts, if I believe that you need to revise that assignment, I will ask that you do so. It is very important that you complete and submit revisions as specified so that you will have a complete final research proposal.

2. Posting of Grades: Normally, I grade on most weekends. My goal is to grade your assignments the same week that they are turned in, if possible. If I am running behind, I will send out an email letting students know the status of their assignments. Because I expect all students to improve on each writing assignment as they progress through the semester, I strive to get your grades with comments to you as soon as I can.

3. Grade Turnaround: In this course, you can expect that I will provide feedback on all assignments in one week or less.
Class/Instructor Policies

Taking a Sociological Perspective: I encourage questions and discussion concerning course material and sharing personal observations and experiences. However, since you are enrolled in a sociology course, the main goal is to utilize a sociological perspective. This means that you should try to analyze various topics with an objective point of view. Objective point of view means looking through the lens of sociology. How does sociology utilize objectivity, you might be asking? Sociology is a social science – qualitative and quantitative research techniques are used to collect data about the social world. Sociologists must always strive to maintain an objective outlook when observing the social world. Therefore, in this course, you will be challenged to look within the layers of a social phenomenon or put another way, to look beyond what you see on the surface. In addition, you will not agree with everything you hear in class from the professor or your classmates. Part of becoming educated requires that your ideas are challenged. As a college-level student, you should be able to see different points of view of the same issue. I expect students to be respectful towards every person in this classroom, even if they disagree with certain viewpoints.

The role of the instructor is to present critical ideas, to offer an analytical framework for understanding the course material, to work with students in providing an inspiring learning environment, and to provide and receive constructive feedback. It is not the instructor’s role to tell the student what to think. The student’s responsibility is to read the readings with a critical mind, to question, to complete assignments on time, to participate in the exchange of ideas, and to work toward an inspiring learning environment. It is the responsibility of all of us to create a safe learning environment free of racism, sexism, classism, ageism, ableism, homophobia, transphobia and heterosexism.

Late Work: When you are turning in assignments, your work must be uploaded in Canvas at the specified due date and time. I will not accept that assignment through email. However, if you are having an issue with an assignment, let me know ahead of time and I will do what I can to accommodate you.

Additional Help: If you need additional help on assignments, papers, or any materials covered in class, please do not hesitate to contact me. The best way to get in touch with me is through email.

Incomplete Grades: I DO NOT GIVE OUT INCOMPLETE GRADES. ALL ASSIGNMENTS AND TESTS ARE DUE ON THE DATES OUTLINED IN THE SYLLABUS.

OTHER POLICY STATEMENTS

A Note about Sexual Violence at A&M-Central Texas

Sexual violence is a serious safety, social justice, and public health issue. The university offers support for anyone struggling with these issues. University faculty are mandated reporters, so if someone discloses that they were sexually assaulted (or a victim of Domestic/Dating Violence or Stalking) while a student at TAMUCT, faculty members are required to inform the Title IX Office. If you want to discuss any of these issues confidentially, you can do so through Student Wellness and Counseling (254-501-5955) located on the second floor of Warrior Hall (207L).

Sexual violence can occur on our campus because predators often feel emboldened, and victims often feel silenced or shamed. It is incumbent on ALL of us to find ways to actively create environments that tell predators we don’t agree with their behaviors and tell survivors we will support them. Your actions matter. Don’t be a bystander; be an agent of change. For additional information on campus policy and resources visit the Title IX webpage [https://www.tamuct.edu/compliance/titleix.html].

The Use of Artificial Intelligence (AI)
The use of artificial intelligence (AI) to create, develop, or inspire any work is considered an act of plagiarism and is prohibited. Although AI technology is constantly advancing and exciting, it has no place in education and learning. This is because relying on AI prevents us from learning from our experiences and each other, exercising our creativity, solving problems, and contributing our ideas in an authentic manner. In essence, college is a place for learning, and this particular course is dedicated to enhancing our writing skills, a task that AI is simply incapable of performing.

Embedded in Canvas is turnitin, which detects plagiarism and AI text. If AI is detected for any assignment, you will initially receive a zero. However, I will allow you to resubmit the assignment to earn all possible points. To avoid any issues, I suggest not using AI because doing so will save us both time. If you have any questions, please let me know.
Course Requirements

1. **Research Design Drafts for Final Proposal Paper (200 total points):** You will complete three drafts (assignments). These drafts are designed to help in the development of your final proposal paper. Also, take a look at [https://www.ncbi.nlm.nih.gov/pmc/articles/PMC5037942/](https://www.ncbi.nlm.nih.gov/pmc/articles/PMC5037942/) or the pdf. file located under the Research Proposal Paper assignment tab in Canvas. This is an excellent resource, providing what your actual research proposal paper should contain.

**Instructions:** There are three parts to this assignment with each having a different due date. The goal is to complete each draft, which will culminate into your Final Research Proposal Paper. The more work you put into these assignments, the less you should have to complete at the end of the semester when writing the final paper proposal. But the main goal is to construct an outline for what will become your final project. For the questions posed below, do not simply provide a one sentence answer. Provide dialog to support your answers. The grading rubrics for each draft are also located at the end of your syllabus. In addition to your textbook (Schutt 2021), you will also find helpful *Writing in Sociology: A Brief Guide* by Smith-Lovin and Moskovitz (2017). This short guidebook will help in the writing of your design drafts as well as your final proposal paper.

**Part 1: Research Question Development (50 total points) – Due Saturday September 30 by midnight**

1. State the topic in which you want to write your research proposal. Provide detailed information about your topic, enough that the reader understands the social problem. Remember that the topic must be **narrow** in scope. (10pts)

2. What is your research question? Is it exploratory, explanatory, or descriptive in nature? (You will find this information in Chapters 1 and 2 of your textbook) (10pts)

3. What theoretical perspective drives your research question and your research? (i.e. inductive or deductive found in Chapter 2) (10pts)

4. Why are you investigating this topic? Why is this social problem important to investigate? (10pts)

5. You will earn points for spelling, grammar and sentence structure. (10pts)

**Part 2: Review of the Literature – Annotated Bibliography (110 total points) – Due Saturday October 21 by midnight**

1. To begin your exploration of the topic, provide an annotated bibliography of 10 scholarly research articles on your topic. You should write up to **no less than 100 words** (double-spaced) for each article summary. You can certainly write more. **You are NOT cut/pasting directly from the article.** It is your summary regarding the important details about the research that you find essential. For each citation, list your citation in ASA. Right below that, provide your summary.
2. Each article in your annotated bibliography is worth 10 points for a total of 100 possible points. You will also be graded on spelling, grammar and sentence structure (10pts) = 110 total points.

3. Please list your citations in ASA. If you do not, I will take off up to 3 points per article. If you list them correctly the first time, it will make less work for you when submitting your final theory research paper.

4. Also, when you write the actual summary of each citation, practice using ASA in text. Make use of your ASA guide and ask questions if you have them. **Your summaries should be no less than 100 words but you can provide more dialog as you see appropriate.**

5. You will use the annotated bibliography to construct your literature review in the final research proposal due at the end of the semester. **This means that you will not cut/paste the annotated bibliography into the final paper. If you do, you will not earn points in the final paper proposal for your literature review section.** The summaries are needed to help you construct your final review of the literature. Let me know if you have any questions.

**Part 3: Research Design (40 total points) – Due Saturday November 11 by midnight**

1. Choose your research design. Depending on what method you choose, you will need to discuss how you will collect your data, state hypotheses, define concepts, variables etc. (10pts)

2. How you will you collect your sample? This will depend on the methods that you choose (i.e. Qualitative vs. Quantitative) Please be specific about your sampling method. (10pts)

3. What might be some of the limitations of your proposed study? (10pts)

4. You will earn points for spelling, grammar and sentence structure (10pts)

**2. Final Research Proposal Paper (200 points) – Due Monday December 11 at 11:59pm:**
Your final paper will include the sections that are contained in a research proposal paper (except for the results since you will not actually conduct the research). Your assignments/drafts leading up to the final paper should be utilized for the final project. **Keep in mind that you are not doing the actual research.**

**The Format and Organization of Paper**

- Font: Times New Roman 12
- Margins: 1” (inch) top and bottom, 1 (inch) left and right
- Pages should be numbered (page # centered at the bottom of the page)
- Your literature review should include no less than 10 scholarly research articles.
- Please double space your paper.
- 10 - 15 pages of written text (2500 to 3750 words). All items in the appendices, your abstract and reference page are not included in the page totals.
- You should use American Sociological Association (ASA) Reference style.
Please organize your final paper by using the following sections. The website https://www.ncbi.nlm.nih.gov/pmc/articles/PMC5037942/ OR the .pdf located under the research proposal submission tab in Canvas, should be used to help you understand what sections need to be included in your proposal. Below are the sections that you will want to include in your final research proposal paper:

1. **Abstract – 200 words**
2. **Introduction, Background and Significance**
3. **Review of the literature**
   - Your annotated bibliography is NOT your review of the literature. You want to write a literature review as you would for any social science research paper. Your annotated bibliography is used to help construct your final literature review section of this final paper proposal, but that is all. If you have questions, please let me know.
4. **Aims and Objectives**
5. **Research Design and Methods**
   - In this section, you want to tell the reader what kinds of methods you would use if you were going to conduct your research project. You might include some of the following (depending on your chosen methodology):
     - **Measurement of concepts and variables**
     - **Data Collection Method/Analysis**
     - **Selection of Subjects – Sample**
6. **Final Conclusions/thoughts**
   - The conclusion should highlight why the student’s research is needed, ethical issues, budget considerations, limitations, and the implications that can be anticipated from your study. You can use what you have learned from your textbook to help formulate your dialog.
7. **References (in ASA format)**
8. **Appendices (if applicable)**

3. **Research Article Critique Papers (4 papers x 45pts/each = 180 total points):** For your Research Article Critique Papers, I will provide you with an article to critique. In your tentative course syllabus, you will find the due dates for these papers. I will specify which article to critique for that week. **The link to each article is located in Canvas under each assignment tab.**

Just a word of warning. I do not want you all to copy/paste your information directly from the articles to fill in the information. Please provide your own analysis. If you do need to directly quote, use proper referencing. If all of your information is copy/pasted into your final assignment, this will be considered an act of plagiarism.

**Directions:**
- For your Research Article Critique Papers, I will provide you with an article to critique. In your tentative course syllabus, you will find the due dates for these papers. I will specify which article to critique for that week. Your articles are located under each assignment link in Canvas.
- Read the article and fill out the following information below, providing some detail regarding each section. My goal is to provide you with an article that is relevant to the course information you are learning about for that week OR material we have already covered.
However, keep in mind that you may not understand everything that you read but the goal is to study each article and do your best to determine the correct answers.

- On page 301 (Appendix A) of your textbook, you can review “Questions to Ask about a Research Article.” On page 303 (Appendix B) of your textbook, you will also find an outline detailing “How to Read a Research Article.”
- Please make sure that you practice good spelling, grammar and sentence structure. This is a senior level class and you will earn points for your writing skills.
- You will find your grading rubric at the end of your syllabus. Do not leave any of your sections blank. If you are unsure of your answer, provide some dialog. I would prefer that you at least try. Sections of your critique include:

2. Theoretical orientation (Chapter 2 covers inductive, deductive etc).
3. Measurement (Chapter 4 covers measurement)
4. Sampling (Chapter 5 cover sampling)
5. Research design - Specify type of method (examples below):

7. Reporting (conclusions)

4. Postings (13 Postings x 13 points each = 169 total points):
   - You will have 13 postings for this course. You will be required to comment on a question (s) that I post and then respond to three of your classmates. You will receive a total of 13 points for providing a substantive post, responding to three classmates, presenting good writing skills and adhering to deadlines.
   - In your tentative schedule below, you will find the dates and times when postings open for discussion and when they are no longer available. “No longer available” means that once the discussion is closed, you will not be able to make up those points.
   - **Weekly posts will open up on Mondays at 8:00am and close on Fridays at 11:59pm. Your main posting will be due by Wednesday evening at midnight.** If your main posting is not submitted on time, you will not earn all points. Additionally, you will have until Friday at midnight to complete all replies to at least three classmates.
   - You will post to questions that will cover material from your readings and various topics that we discuss in this class. Since the postings cover your readings, I would
like you all to use your book as a reference. I do not want information cut/pasted from the internet such as Wikipedia. If you do so, you will not earn points for that posting.

- Whenever you post, I also want you to reference using ASA. Remember that anytime you take information from a source (either directly quoting or paraphrasing), you must reference even if you are doing so in a posting.
- All posts must be substantive and demonstrate to me that you have done all the reading associated with the discussion. In order to get full credit for your individual post, you must answer each question that I pose to you. In order to get the points in responding to your classmates, you must put thought and effort into your response. A thin answer such as “I totally agree with you” or “That was a really cool post” will not be considered for credit.

**GRADING RUBRICS FOR COURSE REQUIREMENTS ARE LOCATED AT THE END OF YOUR SYLLABUS.**

**Grading Scale**

- A = 581 – 645 (Excellent)
- B = 464 – 580 (Better than Average)
- C = 324 – 463 (Average)
- D = 194 – 323 (Below Average)
- F = 193 and below (Failing)

**The Use of Artificial Intelligence (AI)**

The use of artificial intelligence (AI) to create, develop, or inspire any work is considered an act of plagiarism and is prohibited. Although AI technology is constantly advancing and exciting, it has no place in education and learning. This is because relying on AI prevents us from learning from our experiences and each other, exercising our creativity, solving problems, and contributing our ideas in an authentic manner. In essence, college is a place for learning, and this particular course is dedicated to enhancing our writing skills, a task that AI is simply incapable of performing.

Embedded in Canvas is turnitin, which detects plagiarism and AI text. If AI is detected for any assignment, you will initially receive a zero. However, I will allow you to resubmit the assignment to earn all possible points. To avoid any issues, I suggest not using AI because doing so will save us both time. If you have any questions, please let me know.
