**COURSE INFORMATION**

**Course Overview and Description**

Independent research course in which a student proposes and completes an original, quantitative research project in conjunction with three graduate faculty members who serve on the thesis committee. Scheduled when the student is ready to begin thesis. No credit awarded until proposal and thesis are approved, respectively. Six hours of thesis credit is required.

Prerequisites: PSYC 5300 and PSYC 5301 and successful completion of 12 additional credit hours in the degree plan and permission of the Chair of the thesis committee or Department Chair.

### Course Objective

This course is designed to provide students with the opportunity to use systematic research methods and appropriate tools of inquiry to thoroughly investigate a psychological problem or issue. Students must follow the *Thesis Manual* provided by the Office of Graduate Studies.

### Student Learning Outcomes

Course objectives and content will be addressed through the creation of an original research project that will be completed in two phases (i.e., proposal and thesis). The student, under the guidance of a faculty advisor, will utilize sound research methods for the social sciences. In this course, students will:

1. *Demonstrate comprehension and application of fundamental principles, generalizations, or theories.* Students will identify and summarize relevant psychological theories and research in a content area of specialization to contextualize the thesis proposal and final thesis project.
2. *Demonstrate application of factual knowledge (terminology, classifications, methods, trends).* Students will compute and present appropriate statistical techniques given the data collected in the project such as measures of central tendency and variability, correlation coefficients, regression, analysis of variance, and/or chi-square. Students will demonstrate their ability to compute and present appropriate descriptive and inferential statistical analysis of data on the final thesis project.
3. *Analyze and critically evaluate ideas, arguments, and points of view.* Students will read and summarize in writing the development of research on the variables of interest, read multiple research studies on the variables targeted in the thesis and integrate the information in writing to support the position, acknowledge in writing relevant research information that contradicts or is otherwise inconsistent with the arguments in the thesis, write a justification for the proposed thesis research that is based on limitations, shortcomings, and/or gaps in existing research, and write research hypotheses that are directly supported by existing empirical research.
4. *Synthesize academic content from the program to improve thinking, problem solving, and decision making.* Students will develop and design a novel project supported by existing empirical research to address problems, issues, or gaps in knowledge. Students will integrate research results with existing research and theory in the content area of specialization to draw conclusions support by data gathered during the thesis project.
5. *Demonstrate skill in expressing oneself orally or in writing.* Students will utilize appropriate APA style to write summaries of existing research articles and base the justification for the thesis proposal on existing research, write a proposal for the thesis research and revise it based on committee feedback, and write a final report of the thesis research and revise it based on committee feedback.
6. *Demonstrate specific skills, competencies, and points of view needed by professionals in the field.* The student will:
  1. craft, in conjunction with a faculty mentor, an original research idea.
  2. research information related to the thesis project using online tools including the TAMUCT library's databases.
  3. summarize existing peer-reviewed research on the topic and note where more information is needed.
  4. write an original research proposal in APA style and defend it during an oral presentation to the thesis committee.
  5. submit defended research plans through the Institutional Review Board process (for human subjects).
  6. engage in data collection according to the approved plan and in a manner consistent with training on federal requirements.
  7. use statistical computing software (e.g., SPSS) to analyze quantitative data collected through research and interpret it.
  8. propose directions for future research.
  9. write the final thesis to conform to the guidelines stated in the TAMUCT *Thesis Manual* and defend it during an oral presentation to the thesis committee and interested others.

### OTHER POLICY STATEMENTS

#### A Note about Sexual Violence at A&M-Central Texas

Sexual violence is a serious safety, social justice, and public health issue. The university offers support for anyone struggling with these issues. University faculty are mandated reporters, so if someone discloses that they were sexually assaulted (or a victim of Domestic/Dating Violence or Stalking) while a student at TAMUCT, faculty members are required to inform the Title IX Office. If you want to discuss any of these issues confidentially, you can do so through Student Wellness and Counseling (254-501-5955) located on the second floor of Warrior Hall (207L).

Sexual violence can occur on our campus because predators often feel emboldened, and victims often feel silenced or shamed. It is incumbent on ALL of us to find ways to actively create environments that tell predators we don't agree with their behaviors and tell survivors we will support them. Your actions matter. Don't be a bystander; be an agent of change. For additional information on campus policy and resources visit the [Title IX webpage](https://www.tamuct.edu/compliance/titleix.html) [https://www.tamuct.edu/compliance/titleix.html].
